Original Contract Number: _____

Approval Date: _____

Comments:

MEETING OF OCTOBER 6, 2015

TO: Mayor and City Council

FROM: Paul Becker, Finance Director

DATE: October 1, 2015

SUBJECT: Proposal to consolidate the Local Firemen's Pension and Relief Fund with LOPFI by the Local Firemen's Pension Board

RECOMMENDATION:

The City Administration is forwarding this request to the City Council without making a recommendation because of the many uncertainties that exist. The Mayor has continually maintained that he would support consolidating the plan if no costs or minimal costs would be incurred. The Mayor does not feel that all his questions have been adequately answered at this time and is waiting for additional information that has been requested from the Pension Review Board (PRB) actuary.

DISCUSSION:

The Fayetteville Local Firemen's Pension Fund was classified as insolvent by the PRB in 2009. On September 29, 2015 representatives of the PRB (specifically Jody Carreiro the PRB actuary and David Clark the Executive Director of LOPFI and the PRB) came to a special City Council meeting and gave a presentation on the current position of the Local Firemen's Pension Fund and the possible long term solutions to the funding problems. Based on that presentation the Local Firemen's Pension Trust Board is requesting the City Council approve its request that the plan be consolidated with LOPFI.

During the presentation, it was shown that the Fund's assets have an 80% risk of being depleted within the next 10 to 15 years. Potential solutions included allowing the Fund to be depleted; subsidizing the Fund with additional General Fund Revenue by between \$150,000 and \$200,000 for somewhere between 15 and 30 years; or sending the Fund to LOPFI for administration and management, which is termed consolidation. The consolidation options would be to amortize the unfunded liability over either a 15 or 25 year period and to include or exclude a COLA. It was quickly determined that the only financially feasible option would be a consolidation over a 25 year period without a COLA.

If the Fund was sent to LOPFI for consolidation under the plan to amortize the liability over a 25 year period without a COLA, the actuary indicated the City would not incur additional costs **provided the actuarial assumptions were met and the property tax collections increased by 3% per year due to increased assessed property values.** Generally this also means the assumed mortality table proves accurate and an 8% rate of return on current assets is achieved.

The amount the City would pay LOPFI in 2016 would be 33.3% of covered payroll (current fire personnel working). This would be an increase from 24.5% which is the current LOPFI rate.

That is an increase of \$561,262 in dollars, which would be covered in what we currently collect from property taxes and insurance turnback for the Fund. We would, of course, send all of the amounts collected from these sources to LOPFI to reduce the unfunded liability as quickly as possible. This is in keeping with the actuary's recommendation. However, that percentage rate is only certain for 2016 and subject to change after that.

It is important for the Council to understand that currently the Pension Fund is primarily responsible for the unfunded pension liability and that if the Council agrees to consolidate the Fund the City becomes primarily responsible for that liability. Again, if all actuarial assumptions aren't met, including an 8% rate of return on investments or if the mortality patterns do not meet expectation, the City would be liable for any additional costs over and above the amounts being collected for the old Fund, which would have to be paid for by the General Fund and those costs could be significant. The chance of that happening are speculative and potential amounts if any are difficult to determine.

BUDGET/STAFF IMPACT:

Purpose of Our Report & Presentation

- Current status of Pension Fund
- Changes since our last report
- Projections of Current Plan
- Projections of LOPFI consolidation

Recent Valuation Results

	Unfunded Accrued Liability	Market Value of Assets	Funded Ratio
12/31/2009	\$15,061,519	\$5,787,509	27.8%
12/31/2010	\$14,937,189	\$5,573,909	27.2%
12/31/2011	\$15,144,204	\$5,015,419	24.9%
12/31/2012	\$14,990,957	\$4,682,930	23.8%
12/31/2013	\$14,139,985	\$4,624,857	24.6%
12/31/2014	\$13,979,405	\$4,377,557	23.8%

Recent Valuation Results

	Calculated Contribution	Actual Contribution	Ratio
12/31/2009	\$3,155,357	\$611,055	19.4%
12/31/2010	3,240,353	631,157	19.5%
12/31/2011	3,346,655	629,918	18.8%
12/31/2012	3,402,323	741,091	21.8%
12/31/2013	3,250,675	747,511	23.0%
12/31/2014	3,214,908	756,819	23.5%

Financial History – pages 9-10

- Note Non-Investment Cash Flow.
 - Over \$600,000 outflow per year.
- Assets from \$9.6 million to under \$4.4
- Ratio of Assets to Expenses: 3.1
- Average 10 year return, 5.63%

Sources of Income – page 9

- No Actives, so no employee/employer match contributions
- Local Millage
 - Increased 9% per year first four years
 - Increased 1.5% per year last five years
- Premium Tax formula changes in 2011
 - Almost \$100,000 per year more beginning in 2012

Page 17– Benefit Increases

- 50% to 65% base benefit December 6, 1996
- 65% to 90% base benefit June 6, 2001
- 3 year temporary 3% compound COLA, November 20, 2003
- No Change Based on a January 4, 2007 cash flow study based on December 31, 2005 valuation results.
- December 2009, PRB declared “Projected Insolvent,” we met with boards October, 2010.

Changes since 2010 Report

- 2010 report projected Unfunded about \$1.5 million larger than actual 12/31/2014.
- Cover letter, page 2
- About \$900,000 more investment income in 2010-2014 than expected
 - One of the best 5 year periods in the market
- Over \$300,000 additional premium tax due to 2011 law change.
- About \$200,000 in gains from mortality worse than expected.

Where is the Fund headed?

Cash Flow Simulation Process

- Valuation vs. Cash Flow
- Snapshot vs. Yearly Projection
- Liability assumptions vs. Added Asset assumptions
- Single Interest Assumption vs. Rate Simulations
- Guess vs. Assumption vs. Prediction
- Assumptions – pp 18-34

Results

- Charts found in Exhibit 2, page 3
- 2,000 simulations over 30 years of 6 classes of assets
- Arrange results from worst to best
- The worst 5% of the results are below the first red line
- The worst 10% of the results are below the first blue line

Fayetteville Fire Pension Fund

1/1/2015 Current Plan, Projected Assets Simulation

What this graph tell us

- 80+% Risk of Ruin: Risk of depleting assets before all benefits are paid.
- CANNOT earn our way out, need 10% every year (without variance), with liquidity concerns restricting investment options quickly.

Fayetteville Fire Pension Fund

1/1/2015 Current Plan with Additional \$150,000 per Year for 30 Years, Projected Assets Simulation

Fayetteville Fire Pension Fund

1/1/2015 Current Plan with Additional \$200,000 per Year for 15 Years, Projected Assets Simulation

What these graphs tell us

- Solved for the amount of money necessary to keep Local Plan solvent, with only 5% risk of ruin.
- \$150,000-\$200,000 is less than the calculated contribution in the reports, but still much higher than currently available.
- As will be shown, these amounts are also higher than LOPFI consolidation amounts.

Possible Actions – Local Plan

Exhibit 1, Appendix A

- Maintain Current Direction
- Additional Contributions
- These choices appear to have too high a monetary and/or political cost.

LOPFI Consolidation – What Happens?

- Plan assets transferred to LOPFI
- Local Pension Board dissolved
- City signs an agreement to pay the calculated LOPFI rate
- Benefits are guaranteed

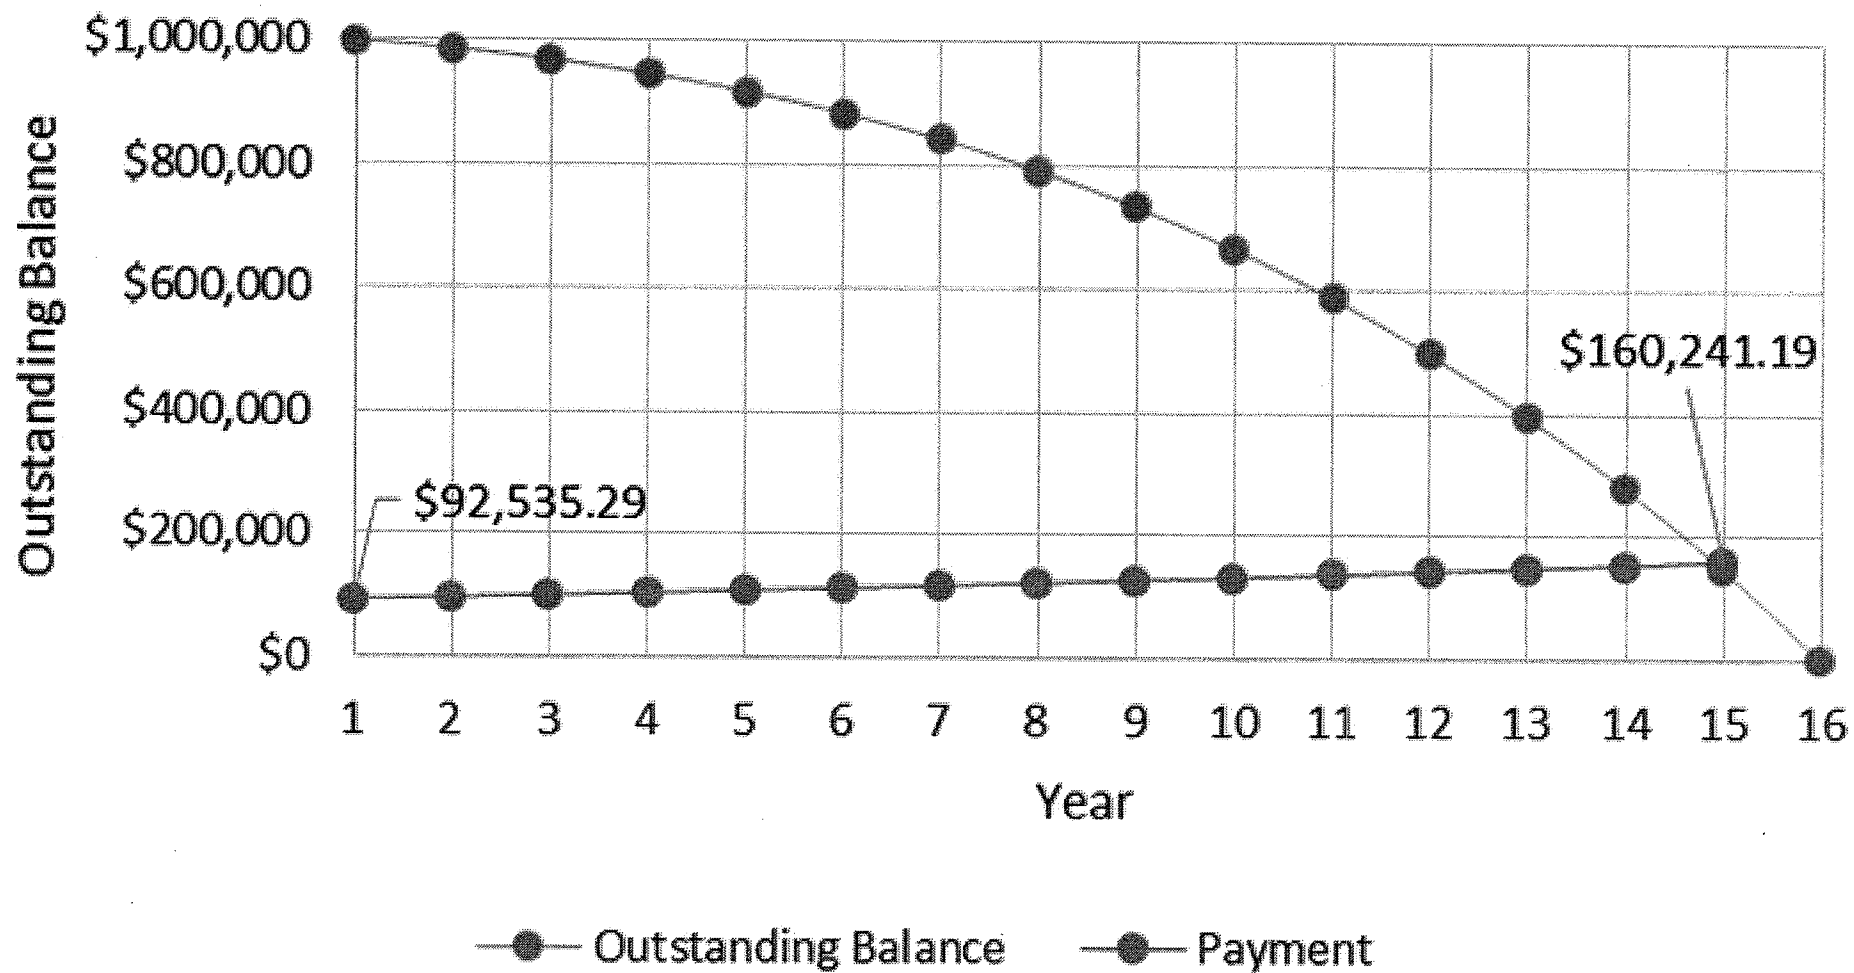

LOPFI Consolidation – Payment Plan?

- 15 year or 25 year (new)
- Closed
- Level Percentage of Pay
- Based on 8% interest
- And 4% salary growth

Level Dollar Amortization

Level Percentage of Pay Amortization

What this means?

	Meet Assumptions	Actuarial Loss-Year 1	No Gain/Loss Pay above rate
Initial UAL	1,000,000	1,000,000	1,000,000
25 year amortization	.063092	.063092	.063092
First year payment	63,092	63,092	63,092
Total City Salary	900,000	900,000	900,000
LOPFI Rate Added	7.01%	7.01%	7.01%
Expected UAL year 2	1,014,384	1,014,384	1,014,384
Actual (Gain)/Loss	0	50,000	-25,000
Actual UAL year 2	1,014,384	1,064,384	989,384
24 year amortization	.064677	.064677	.064677
Second year payment	65,607	68,841	63,990
Total City Salary	936,000	936,000	936,000
LOPFI Rate Added	7.01%	7.35%	6.84%

Important Consideration

- Regardless of the consolidation option—any excess revenue can be used to pay down the unfunded liability
- Better to pay down debt while the calculated contribution is lower (in dollar terms), because funds should be available (ARM)
- Don't just look at first year payment—important to keep increase/liability in mind!

15 Year Amortization Option

- Exhibit 3 (pg. 7-8), and Scenarios J, K, and L (pg. 35-37)
- Projected with different millage growth assumptions
- Even in optimistic growth scenarios, the city would need to come up with additional contributions after the second year
- We don't believe this is a realistic option given the City's constraints

25 Year Amortization Option

- Exhibit 3, and Scenarios E, F, G, H, and I (pg. 30-34)
- All scenarios assume that excess millage and other contributions are used to pay down the liability
- If millage grows at 3% annually and other assumptions are met: current sources project to be sufficient. (Scenario E – pg. 30)
- Over the last 9 years, this has been realized—but the last 3 years have only shown 1.5% growth.

Millage Risk (25 Year Amortization)

- We also projected less favorable millage growth (Exhibits F-I, pgs. 31-34)
- If only 2% growth realized, would need additional contributions in approx. 2032. (Scenario F)
- The additional contributions in the future could be mitigated by additional contributions in the present.
- Approximately equivalent to \$30,000 in additional contributions each year (Scenario G)

Millage Risk (25 Year Amortization)

- Exhibits H and I show projections assuming 1% Millage Growth
- Would be able to make LOPFI contributions with current sources (assuming assumptions met) until 2026
- Additional contributions required starting 2026 are approximately equivalent to an additional \$90,000 per year on top of current revenue streams

Other Risk Factors

- Future results sensitive to more than just millage collections.
- Investment Return (different from 8%)
- Mortality (different from expected)
- Premium Tax (Formula could change—revenues to fund could be impacted)

Questions/Concerns

- Happy to delve into details or answer more general questions

RE: Fayetteville Fire Pension Fund

Ladies and Gentlemen:

This report presents the results of our January 1, 2015 actuarial study of the assets and liabilities of the Fayetteville Fire Pension and Relief Fund (the "Pension Fund"). This report goes beyond the present value of the liabilities calculated in the regular valuation to show the timing and development of the income and expense streams. These streams are then reviewed with various proposals to improve the long term security of the Pension Fund.

This report was completed according to the request of the Arkansas Fire and Police Pension Review Board (PRB). The PRB is providing this information to the Pension Fund to meet their obligation to provide options to improve funding as described in ACA §24-11-208.

PROCESS

We prepared a cash flow analysis. We first project out the benefit payments from the Pension Fund for the next 50 years. Next, the contribution income to the fund was projected. The contribution income includes the member contribution, the city match, local millage contributions, and insurance premium tax distributions. Exhibit 7 details the assumptions we made regarding these contributions. Note that in the 2011 legislative session, the methodology for allocating insurance premium taxes was changed and was first implemented in 2012. This report reflects that change.

Once the benefit payout and contribution income projections were prepared, investment income was added. Instead of assuming a single level rate of return, we have simulated the investment results based on your current and expected future asset allocation. Exhibit 2 shows the results.

Fayetteville Fire Pension – p 2
September 28, 2015

CURRENT STATUS OF FUND

If no changes are made, the Pension Fund is expected to deplete its assets between 10 and 15 years from now. We calculated the risk of ruin to be over 80%. That is, in 80% of the simulated results the Pension Fund spends all of its assets before all benefits are paid. The graph in Exhibit 2 shows the various outcomes of the simulations. Therefore, we would conclude that without some significant change in the plan's cash flows, the Fund will run out of money.

This risk of ruin is slightly lower than projections showed five years ago due to a number of factors, but the risk is still at an unacceptable level. The plan's position was better than projected primarily due to stellar investment returns, favorable mortality experience, and large increases in premium tax revenues due to legislation enacted in 2011.

The report completed as of January 1, 2010 (five years ago) projected that the Unfunded Accrued Liability would be about \$15.4 million by 12/31/2014. The actual UAL at 12/31/2014 was about \$13.9 million. This \$1.5 million difference is comprised primarily of investment earnings above the assumed amount (\$940,000), the large increases in premium tax revenues due to the new formula (\$317,000), and mortality experience gains (\$280,000).

POSSIBLE ACTIONS

We were asked to look at possible actions that could be taken by the board of the Pension Fund or the city in an effort to ensure that all benefits are paid to all participants. Several of these changes as well as the pros and cons of each action are discussed in Exhibits 1 and 3. Exhibit 1 describes the options available as a locally administered fund. Exhibit 3 discusses the options available under a LOPFI consolidation. The purpose of the report is not to dictate a particular action, but to describe for the board and the city the effects of different actions.

The possible actions reviewed are:

1. No change in current plan, investment strategy or income.
2. Additional city contributions
3. LOPFI consolidation – 25-year amortization
4. LOPFI consolidation – 15-year amortization

Fayetteville Fire Pension – p 3
September 28, 2015

PROJECTION DETAILS

In order to aid the city with its decision regarding LOPFI consolidation, we have added two appendices which include several charts projecting the status of the plan under several different assumptions. The key results of these projections are discussed in Exhibit 1 (Appendix A) and Exhibit 3 (Appendix B).

CONCLUSIONS

Generally, we would conclude that the plan's position is likely to deteriorate without additional revenue and that LOPFI consolidation will become more expensive the longer the board waits to act. We would expect the plan to earn higher investment returns under LOPFI administration, partially due to the removal of liquidity constraints, although the city would be required to make the calculated contributions every year.

Note that the results shown in this study are projections, and not predictions. The results of our projections depend, of course, upon the actuarial assumptions being met. The actual results WILL vary on a year-by-year basis from the projections. Because of the size of the group, some of the results may vary materially from these projections. This report is based on the participant and financial data you supplied to the Arkansas Fire and Police Pension Review Board. We did not audit this data, although we did review it for reasonableness and consistency. This report is not intended for any other purpose or for use by persons who are not familiar with such matters.

If you have any questions or comments, please let me know.

Sincerely,

Jody Carreiro, A.S.A., M.A.A.A.

Actuary

EXHIBIT 1

POSSIBLE ACTIONS – LOCAL PLAN

This report is to provide possible actions and the projected effects of those actions. This should provide the Board with the tools it needs to make important decisions for the future of the Fund. The following is a discussion of possible changes in the Pension Fund, along with positive and negative effects, if the plan remains under local control. We also make reference to projections we have made, included in Appendix A, which model the potential impact of each action. The discussion of various forms of LOPFI consolidation are included as Exhibit 3.

No Changes. The Pension Fund could continue on the same path that they are currently pursuing. The base benefit projection shows that the Pension Fund would deplete assets in 2020. If you assume the city would then be responsible for the benefit payments, then the additional contributions needed would be benefit payments in excess of millage and premium tax.

Positive. The Fund nor the City have to take any additional action at this time.

Negative. The projections show that the Fund cannot “earn” its way out of this in the long term. The projection shows that the Fund would need to earn about 10% every year to not deplete assets. A portfolio that could earn 10% would necessarily have a very high variance.

Negative. If the Fund did deplete its assets, the City is assumed to be responsible for picking up the benefit payments. This would be difficult for the City and would be a public relations problem.

Negative. The bond rating services do review the pension liabilities contained in the City’s financial reports. If the unfunded liabilities continue to grow or the Fund is depleted, it could affect the City’s ability to issue bonds. Please note that GASB67/68 moves the unfunded liability up to be a balance sheet item.

Scenario A of Appendix A illustrates a projection of the Fund’s position, assuming no changes, using the PRB’s 5% investment return assumption with 1% millage growth. The plan projects to deplete assets in 9-10 years, with additional contributions required to make up the shortfall until approximately 2034. The expected first year LOPFI contribution continues to rise until assets are depleted.

Scenario B also models the Fund’s position with no changes, but under the assumption of 2% annual millage growth. Under this scenario, the Fund would deplete its assets approximately 1 year later than in Scenario A, but the Fund would still require additional contributions for seven years in order to cover benefit payments.

EXHIBIT 1 (continued)

Additional City Contribution. The City could find additional contributions to be made to the Pension Fund to reduce the risk of ruin to an acceptable level, that is, 5%. We ran various simulations to solve for the additional amount needed over 15 years (\$200,000) and over 30 years (\$150,000).

Positive. The City significantly reduces the risk of having to pay benefits from general assets.

Positive. The City improves its financial statement by reducing the unfunded liabilities and possibly their standing with bond underwriters.

Negative. The current economic conditions make it difficult for cities to find any additional money for pension plans.

Scenarios C and D of Appendix A show projections under circumstances where the city board started making such additional contributions to the Fund. How these amounts were determined is discussed in further detail in Exhibit 2.

Scenario C illustrates the impact of an additional \$150,000 per year in contributions over the projection period (at 5% investment return and 1% millage growth). The assets would decline to about \$1.3 million before stabilizing somewhere around 2029, and revenues would cover benefit payments in approximately 2031.

Scenario D uses the same assumptions to show the impact of an additional \$200,000 per year over the next 15 years. The plan's unfunded liability would steadily be paid off, although the Fund would still not be fully funded by 2039. Assets would decline until approximately 2026 before stabilizing just above \$2.3 million.

Under both of these scenarios, future LOPFI consolidation costs are lower than in Scenarios A and B, as the unfunded liability is lower—the earlier the contributions are made, the better.

EXHIBIT 2

SIMULATION RESULTS

Following this page there is a series of three graphs showing the projected assets and the probabilities based on the simulation of investment results. These results are based on the actuarial assumptions concerning income and benefits detailed in Exhibit 7. The simulation looked at 2,000 series of 30 year investment results. The graph is read that the worst 5% of the results fall below the first red line, the worst 10% fall below the first blue line. The green line is where half of the results were better and half were worse. The three graphs are as follows:

Current Plan. This is the plan as it is now with no additional income. Over 80% of the results depleted the fund, so even the median (green) line goes to zero. Another thing to note is that many simulations which deplete assets have losses in the first few years. In other words, the fund cannot afford another big loss in the near term.

Additional Amount for 30 Years. We ran several simulations to find the additional city money that would be needed to reduce the risk of ruin to about 5%. This would be considered an acceptable level of risk. The graph shows that \$150,000 additional every year for 30 years would reduce the risk to about 5%. We should also note that additional money and moving to a more conservative portfolio as the Fund becomes better funded further reduces risk.

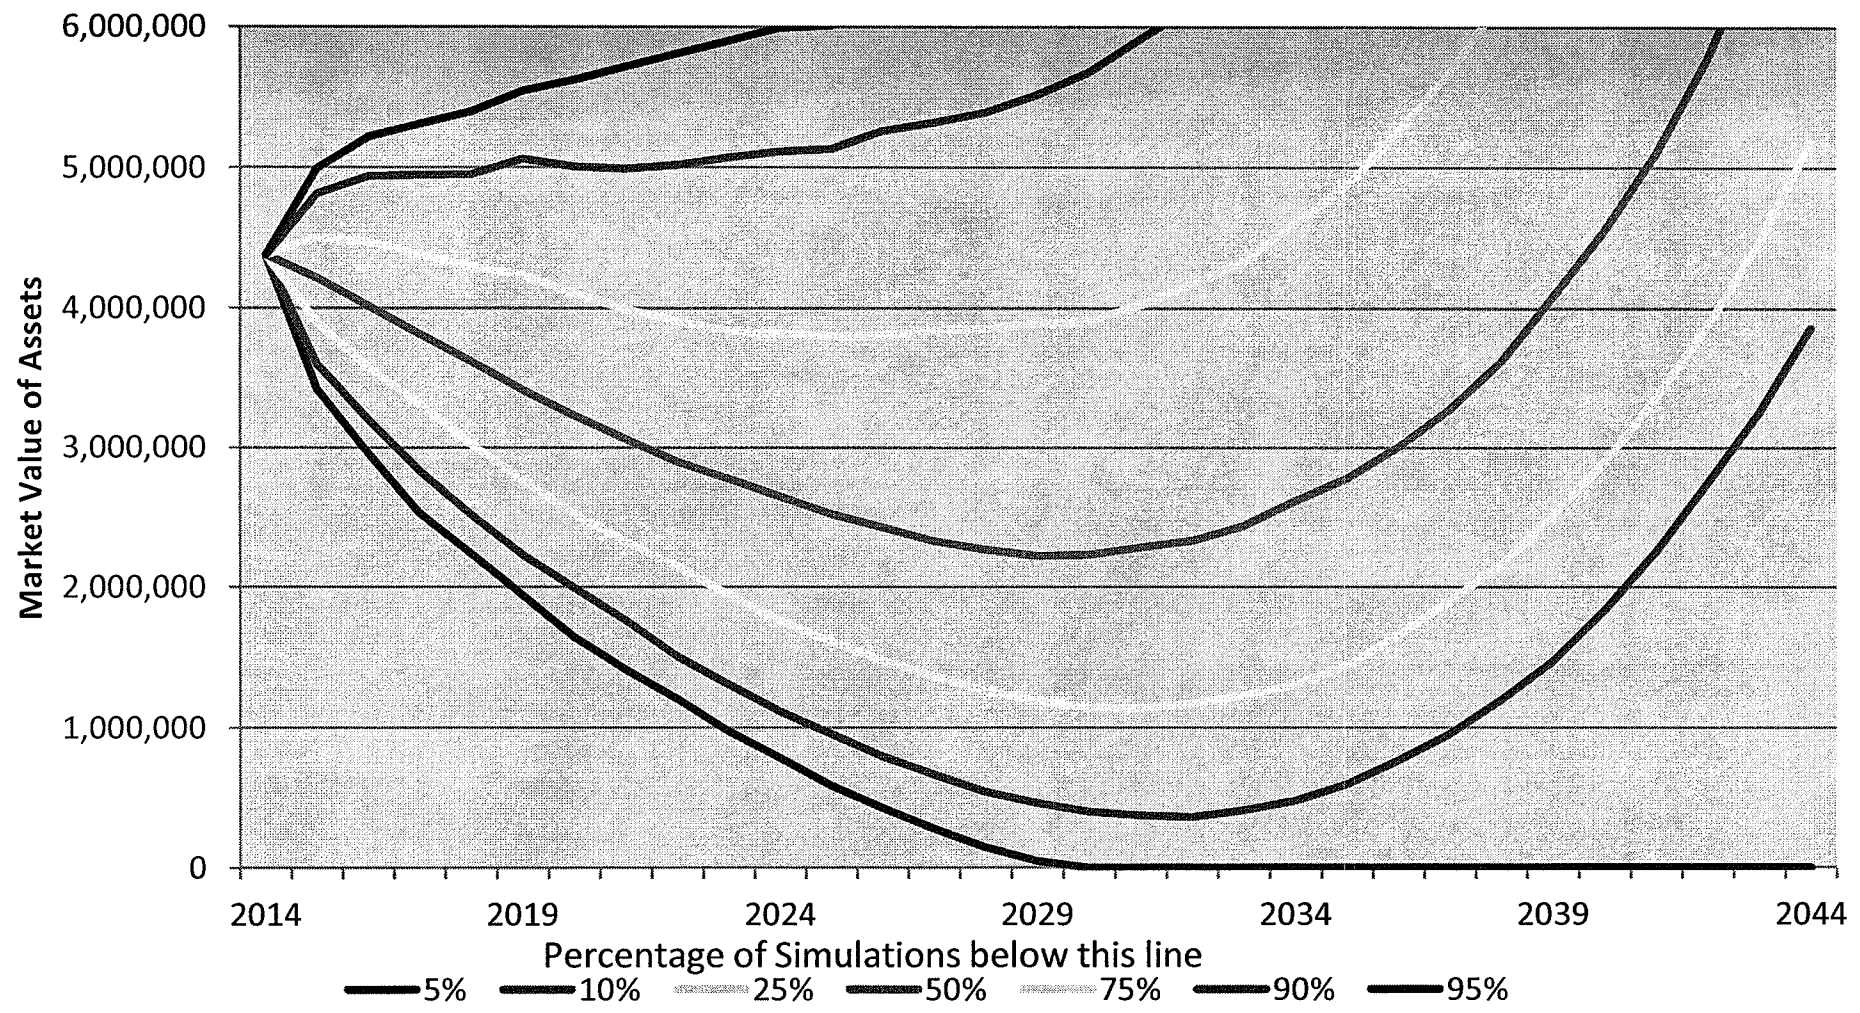

Additional Amount for 15 Years. We also solved for an additional city contribution over the next 15 years to reduce the risk of ruin to about 5%. This amount was found to be \$200,000. This is shown in the last graph.

Fayetteville Fire Pension Fund 1/1/2015 Current Plan, Projected Assets Simulation

Fayetteville Fire Pension Fund

1/1/2015 Current Plan with Additional \$150,000 per Year for 30 Years, Projected Assets Simulation

Fayetteville Fire Pension Fund

1/1/2015 Current Plan with Additional \$200,000 per Year for 15 Years, Projected Assets Simulation

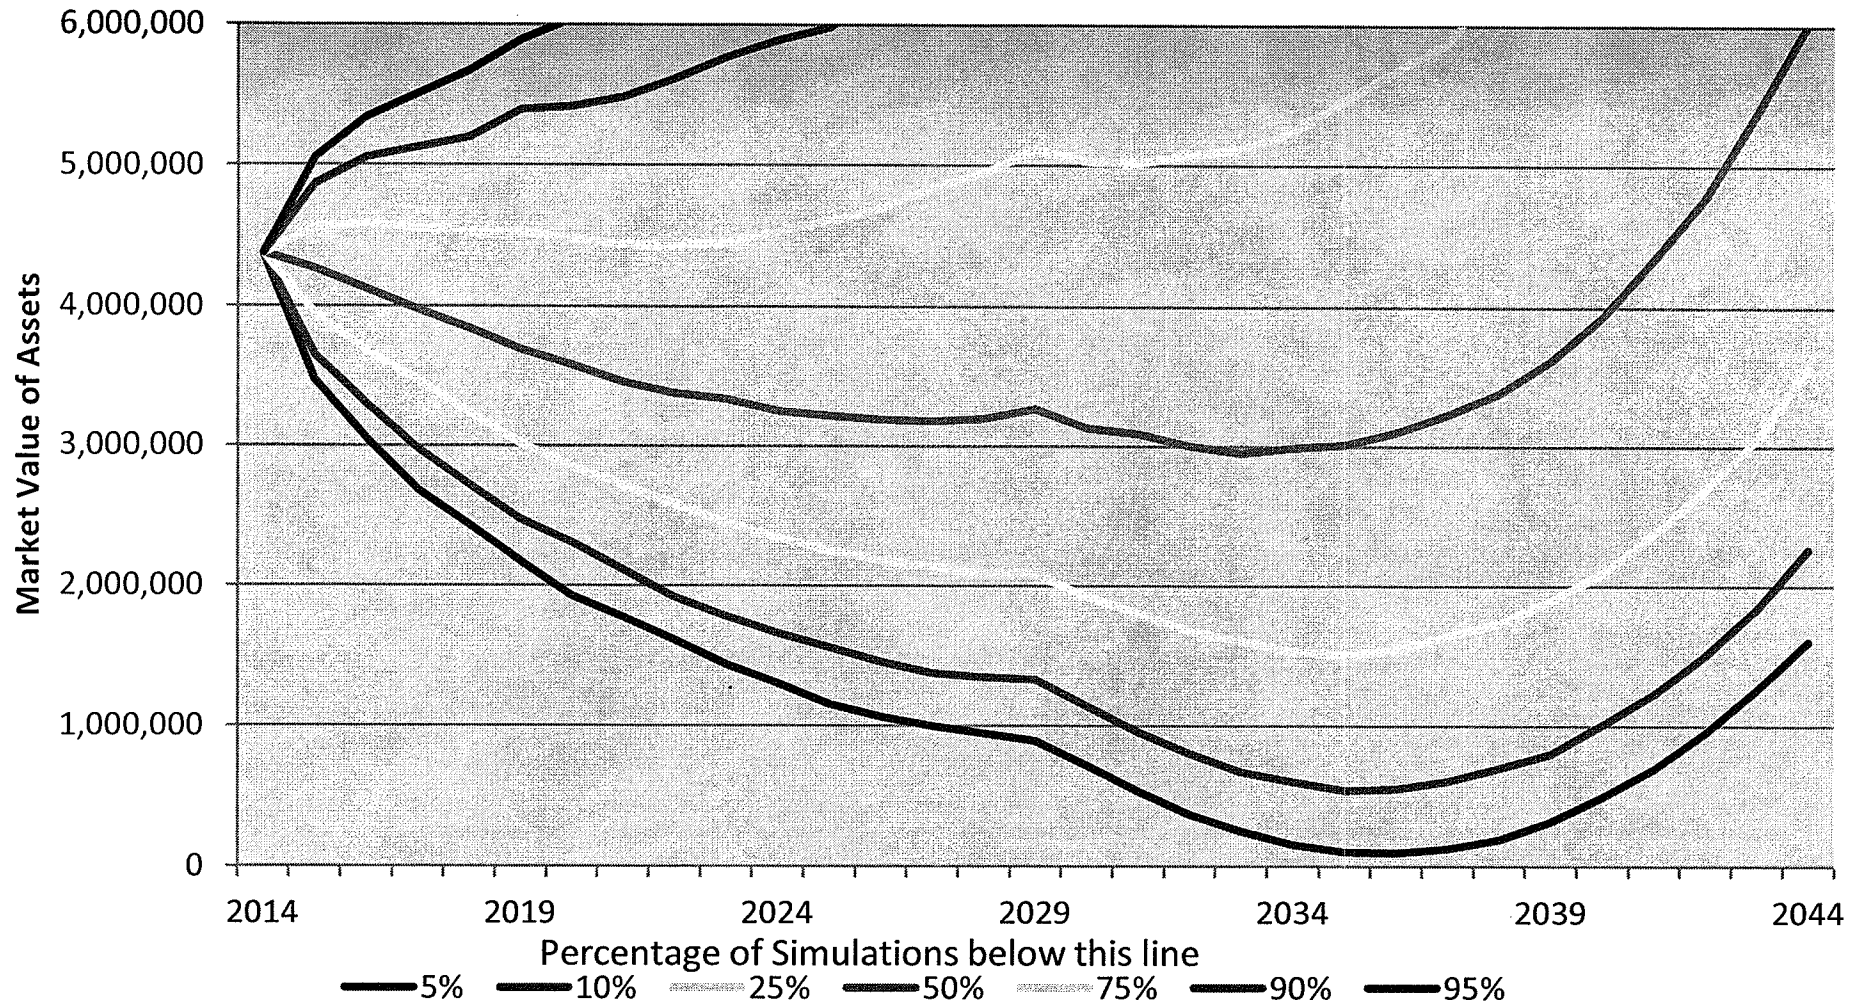

EXHIBIT 3

POSSIBLE ACTIONS – LOPFI ADMINISTRATION

This report is to provide possible actions and the projected effects of those actions. This should provide the Pension Fund with the tools they need to make important decisions for the future of the Fund. The following is a discussion of possible changes in the Pension Fund, along with positive and negative effects, under possible LOPFI consolidation options. We also make reference to projections we have made, included in Appendix B, which model the potential impact of each action.

LOPFI Consolidation. A consolidation would allow the City to use its current income streams of millage and premium tax along with other City funds to pay the unfunded liabilities over a 15 or 25 year period based on the LOPFI assumptions. Our projections considered both 15- and 25-year amortizations, but we believe that the 15-year option would be far too expensive for the city's budget given current revenue streams.

Positive. After consolidation, the benefits are guaranteed by the LOPFI system. This removes the risk of ruin from the City and the Fund.

Positive. GASB 67/68 will move the unfunded liability from the footnotes to the balance sheet of the City. Consolidation will allow the use of higher investment assumptions and therefore improve the City's financial statement and also improve its standing with bond underwriters.

Negative. The City must agree to pay whatever the actuarially calculated costs are under LOPFI. The dollar cost of consolidation increases 4% a year before recognition of other gains or losses. This is faster than premium tax and millage is projected to grow.

Negative. The local board of the Pension Fund is dissolved. There can be benefit improvements (for example, COLAs) in the future, but they come with the City agreeing to pay whatever the actuarially calculated costs are under LOPFI.

LOPFI 25-year Closed Amortization. Scenarios E through I all use LOPFI's 8% investment income and discount rate assumptions. For this reason, the projected investment income is higher and the calculated accrued liability is lower than in the non-consolidation scenarios. Scenarios E - I project 25-year amortizations, while Scenarios J - L look at a 15-year amortizations. Each of these projections assumes that any Fund revenue in excess of the required LOPFI consolidation payment would be used to pay down the unfunded liability.

Scenario E uses the assumptions described above (25-year amortization, 8% discount), with a millage assumed to increase 3% per year. The city could currently afford the LOPFI payment without any additional contributions if all other assumptions are met. The rate of increase over the period shown in Exhibit 4 is just over 3% per year. However, we reviewed other scenarios with lower millage growth, since the past five years has only shown 1.5% per year growth.

EXHIBIT 3 (continued)

Scenarios F and G show a 2% millage growth per year. The LOPFI payments are covered in the first several years using current revenues. However, because the LOPFI payment increases 4% per year, current revenues streams are projected to be insufficient in about 18 years. At that point, the city would need to come up with additional contributions. Scenario G shows that this shortfall is equivalent to about 30,000 per year in additional contributions over the period.

Scenarios H and I show a 1% millage growth per year. The LOPFI payments are covered in the first several years using current revenues. However, because the LOPFI payment increases 4% per year, current revenues streams are projected to be insufficient in about 12 years. At that point, the city would need to come up with additional contributions. Scenario I shows that this shortfall is equivalent to about 90,000 per year in additional contributions over the period.

These Scenarios (F - I) were generated to illustrate the risk involved with different levels of growth in future millage income.

LOPFI 15-year Closed Amortization. Scenarios J - L show projections of the Fund under a 15-year consolidation. This was the only option that LOPFI had available when discussed five years ago. Scenario J projects the Fund's position under a 15-year amortization using a 3% annual millage growth assumption. Scenario K shows 2% millage growth and Scenario L shows 1% millage growth. All scenarios show that even though the initial LOPFI payment could be afforded using current resources, additional resources would be needed in the second and remaining years.

In conclusion, we don't believe that the city could currently afford 15-year amortization option consolidation with current fund revenue streams. However a 25-year amortization consolidation plan, using current millage and premium tax sources as payment, may be feasible without additional contributions. As the differences among these scenarios suggest, future projections are sensitive to variation in future investment returns, mortality experience, and millage growth—any deviation from what we have projected could have a significant impact (to the city's benefit or to its detriment) when considering the plan's future financial position.

EXHIBIT 4

SUMMARY OF FINANCIAL INFORMATION
(Items C, F-H, and J determined by Osborn, Carreiro and Associates, Inc.)

A. INCOME	Year Ended 12/31/2014	Year Ended 12/31/2013	Year Ended 12/31/2012	Year Ended 12/31/2011	Year Ended 12/31/2010	Year Ended 12/31/2009	Year Ended 12/31/2008	Year Ended 12/31/2007	Year Ended 12/31/2006	Year Ended 12/31/2005

10 Year Average Return	5.04%									
Market Value Rate of Return	8.27%	13.45%	7.51%	4.80%	11.06%	14.68%	-18.67%	7.52%	10.13%	1.91%
10 Year Average Return	5.63%									

Note: The assumed liability discount rate is 5%. If the plan does not realize an investment return of 5% or more over the long term, the ultimate cost of the plan will be greater than the liabilities shown in this report. That is, the plan would need more money to meet its obligations.

Exhibit 5

Employee Profile

Employee data needed for the valuation was obtained from the records furnished by the Arkansas Fire and Police Pension Review Board. The following table shows a detailed breakdown of the present participants by the number of participants and total salary.

EXHIBIT 6

PRINCIPLE PROVISIONS OF THE PLAN

<u>EMPLOYEE</u>	Member of Fire Department
<u>EMPLOYER</u>	Fayetteville Fire Department
<u>MEMBERSHIP</u>	Condition of Employment. Firefighters hired after 1982 must join the statewide Local Police and Firefighters Retirement System
<u>CREDITABLE SERVICE</u>	Determined on basis of service since employment
<u>CONTRIBUTIONS</u>	
<u>Employee</u>	6% of salary. Volunteers contribute \$12/year. Refundable if member terminates before retirement eligibility.
<u>Employer</u>	<ol style="list-style-type: none">1. Matching contribution equal to employee contribution2. State Insurance Premium Tax turnback3. Local Millage
<u>FINAL SALARY</u>	Salary attached to the rank of the member at time of retirement, based on regularly scheduled work-week.
<u>DEFERRED RETIREMENT OPTION PLAN</u>	This plan has elected to participate in the Deferred Retirement Option Plan effective 01/25/1996. Members who elect to participate have a DROP account that is increased by the monthly amount of their retirement as if they had retired as of the date DROP was elected. Has not elected coverage under Act 1457 of 1999.
<u>RETIREMENT BENEFITS</u>	
<u>Eligibility</u>	20 Years of Service regardless of age.
<u>Benefit</u>	90% of Final Salary, but not less than \$4,200. (\$1,200/year for volunteer/part-paid). If service exceeds 20 years, the annual benefit is increased by \$240 for each year over 20, up to \$1,200/year extra. (\$120 for each year over 20 up to \$600/year for volunteer/part-paid). If service is more than 25 years, member receives an extra 1.25% (for each year over 25) of Final Salary, payable once the retiree reaches age 60. The benefit cannot exceed 100% of Final Salary.

EXHIBIT 6 (Continued)

DEATH BENEFITS

Eligibility

Death before 20 Years of Service not occurring while performing work in gainful employment outside the fire department, or death after 20 years.

Benefit

1. Widow receives same amount as member is receiving or eligible for.
2. Each child under age 19 receives \$1,500/year. (\$300/year for volunteer/part-paid). If no surviving spouse, child receives spouse's benefit to age 19.

DISABILITY BENEFITS

Eligibility

Permanent physical or mental disability not acquired while performing work in gainful employment outside the fire department.

Benefit

Full Paid Non-duty disability

Retirement benefit but not less than \$4,200/year.

Full Paid Duty related disability

Retirement benefit but not less than 65% of Final Salary and not less than \$4,200/year.

Volunteer/Part-Paid:

Computed as voluntary retirement benefit

EXHIBIT 6 (Continued)

CHANGES IN BENEFITS

December 6, 1996	Based on Cash Flow Valuation, increase from 50% base to 65% base benefit. Volunteers to \$55 base.
June 6, 2001	Based on Cash Flow Valuation, increase from 65% base to 90% base benefit.
November 20, 2003	Temporary 3% Compound COLA for 3 years. Extend DROP to 10 years.
January 4, 2007	NO benefit increases available based on Cash Flow Valuation.

EXHIBIT 7

ACTUARIAL METHODS AND ASSUMPTIONS

The assumptions for this valuation have been selected in accordance with Actuarial Standards of Practice No. 27. The asset valuation method is prescribed in Arkansas Code Annotated 24-11-207. This prescribed asset valuation method directly impacts the investment return assumption. The assumed salary growth is restricted by A.C.A. 24-11-205 in relation to the investment return assumption.

ACTUARIAL COST METHOD

The "entry age normal" cost method has been used.

PRE-RETIREMENT MORTALITY

Deaths have been projected on the basis of the 1983 Group Annuity Table for Males, set back five years for females. Mortality rates at a few sample ages are:

<u>Age</u>	<u>Mortality rate per 1,000</u>
25	0.464
35	0.860
45	2.183
55	6.131

POST RETIREMENT MORTALITY

The 1983 Group Annuity Mortality Table was used. For females, the male table was used with a five-year setback. The life expectancy according to this table is as follows:

<u>Age</u>	<u>Males</u>	<u>Females</u>
55	24.87	29.23
65	16.74	20.68

MORTALITY BASIS AND PROJECTION

The mortality assumptions do not include a projection for mortality improvement. These rates were chosen after an experience study for 2007-2012. No projection was deemed necessary at this time since the recent experience study did not show significant improvement over an experience study for 2000-2006 deaths.

The 1971 Group Annuity Table for Males, set back five years for females was used before the 12/31/2007 Valuation.

VOLUNTARY TERMINATIONS

Annual termination rates at a few sample ages are:

<u>Age</u>	<u>Termination rate per 1,000</u>
20	40
25	35
30	29
35	15
40	6
45	5
50	5
55	5

EXHIBIT 7 (continued)

When a person had less than 4 years of service, we assumed that his chances of voluntary termination were a multiple of thereafter rates, with the following multiples being used:

1st year	2.85
2nd year	2.00
3rd year	1.50
4th year	1.15

ASSUMED DISCOUNT RATE

5.0%

The reports for the valuations as of 12/31/2009 through 12/31/2012 were completed using an assumed discount rate of 5%.

A study of the returns of all fire and police plans was made of the 2006-2012 experience. The components and variations of appropriate portfolios were also reviewed. The Pension Review Board determined that for comparison with previous years and with other similar plans that a single discount assumption of 5% should be used.

DISABILITIES

We continued the disability rates used in prior reports. Disability rates at a few sample ages are:

<u>Age</u>	<u>Disability rate per 1,000</u>
20	0.8
25	0.8
30	0.8
35	0.8
40	2.0
45	2.6
50	4.9
55	8.9
60	14.1

One third of the disabilities were assumed to be service related.

For mortality after disability, we assumed rates based on the Eleventh Actuarial Valuation of the Railroad Retirement System, for occupational disabilities

EXHIBIT 7 (continued)

SALARY GROWTH

We have used the salary scale used in prior reports. Annual assumed growth at a few sample ages is:

<u>Age</u>	<u>ANNUAL SALARY INCREASE</u>		
	<u>Base</u>	<u>Merit</u>	<u>Total</u>
20	4.0%	4.0%	8.0%
25	4.0%	3.2%	7.2%
30	4.0%	2.8%	6.8%
35	4.0%	2.5%	6.5%
40	4.0%	2.2%	6.2%
45	4.0%	1.7%	5.7%
50	4.0%	1.2%	5.2%
55	4.0%	0.7%	4.7%
60	4.0%	0.2%	4.2%

EXPECTED RETIREMENT AND DROP PATTERN

Since the plan allows full benefits at ages younger than the traditional "65", an assumption that will have an important impact is what percentage of people who are eligible for this early retirement will actually take advantage of it.

This will depend on intangible things such as the economy, health, financial ability to retire, Social Security eligibility, and work patterns. Based on recent experience, we are using the following assumed rates:

<u>Age</u>	<u>Retirement rate per 1,000</u>	
	<u>Retirement</u>	<u>DROP</u>
40-59	100	200
60+	1,000	0

Note: A member was assumed to be eligible for retirement or DROP after attaining age 40 with 20 years of service. It is also assumed that twice the normal number will retire or elect DROP in the first year of eligibility.

EXHIBIT 7 (continued)

RETIREMENT PATTERN AFTER
ELECTION OF DROP

Once a person is on DROP (Deferred Retirement Option Program), they were assumed to retire from the department as follows:

<u>Years on DROP</u>	<u>Retirement rate per 1,000</u>
1	100
2	200
3	200
4	300
5 or more	1,000

EXHIBIT 7 (continued)

INCOME RELATED ASSUMPTIONS

LOCAL MILLAGE

The local millage was assumed to produce \$525,000 in income per year increasing 1% per year. This amount averaged about \$515,000 over the past five years and has grown about 8% (about 1.5% per year) over the last five years. The 1% future assumption is based on long term real estate projections tempered by recent results.

CITY CONTRIBUTION

The City's matching contribution was assumed to be 6% of covered payroll.

PREMIUM TAX

The actual insurance premium tax turnback of \$221,178 (which includes additional allocation) was used for 2015. Act 979 of 2011 significantly changed the formula for allocation of premium taxes, though the amounts allocated under the new formula should be more stable as time passes.

INVESTMENT SIMULATIONS

The investment simulations were based on the actual portfolio of the plan as of December 31, 2014 and the projected portfolio anticipated by the investment policy. The simulations are based on the American Academy of Actuaries 2006 paper, "Construction and Use of Pre-packaged Scenarios".

The pre-packaged scenarios were in general categories that we used. Money Market (MM) includes cash and money market instruments. Government (Gov) and Corporate (Corp) are intermediate term high quality bonds. There is a category for Large capitalization (LCap) and small capitalization (SCap) US stocks. The Mid Cap stocks in the portfolio were equally split between LCap and SCap. The international (Intl) stocks are also included.

Board of Trustees
Fayetteville Fire Pension Fund
113 West Mountain, Suite 308
Fayetteville, AR 72701

Dear Trustees:

Enclosed is the consolidation report that lists revised employer contribution rates to assign administration of the local fire pension fund to LOPFI. Pages four through seven, for paid service, and page 17, for volunteer service, provide the employer contribution rates for Local Plan and LOPFI benefits. The rates are:

Paid Service: Using a 15-year amortization results in 36.96% of payroll without a Cost Of Living Adjustment (COLA) for the Local Plan *or* 42.94% of payroll with a Local Plan COLA.

Using a 25-year amortization results in 33.37% of payroll without a Local Plan COLA *or* 37.63% of payroll with a Local Plan COLA.

Volunteer Service*: Using a 15-year amortization results in a monthly dollar employer contribution of \$314.72 without a Local Plan COLA *or* \$394.88 with a Local Plan COLA.

Using a 25-year amortization results in a monthly dollar employer contribution of \$253.78 without a Local Plan COLA *or* \$318.42 with a Local Plan COLA.

If the Local Plan has its administration assigned to LOPFI this year the above employer contribution rates will be used through the 2016 calendar year.

As stated earlier the valuation provides costs for a 15-year and 25-year amortization period for the Local Plan liabilities. Once the amortization period is properly completed (all actuarial assumptions met), the Local Plan portion of the employer contribution rate will be satisfied. This will then leave the ongoing LOPFI employer contribution costs. This report is valid until October 30, 2015, which means LOPFI must receive all documents discussed in the next paragraph by October 30, 2015 in order to use these results.

*-Since Fayetteville Fire does not currently have any active LOPFI volunteer firefighters, the employer contribution rates for volunteer service do not include a rate for LOPFI volunteer coverage. Should volunteer firefighters be enrolled in LOPFI, the applicable required employer contribution rate would be added to the volunteer rates in use at that time. For reference purposes, the required employer contribution rate for LOPFI volunteer coverage is currently \$5.60 per member, per month.

Fayetteville Fire Pension Fund
June 11, 2015
Page 2 of 2

Should your Board and city officials wish to proceed with consolidation, please execute the enclosed Resolution, Ordinance, and both *originals* of the Administrative Services Agreement. Do not alter or replace the Agreements. Both originals must be received by LOPFL. One will be returned to you after approval of the LOPFI Board of Trustees. Lastly, please be certain the Ordinance stipulates which amortization period was approved (15-year or 25-year) and if a COLA was approved for the Local Plan.

If you have questions, please feel free to contact me at your convenience.

Respectfully,

David B. Clark
Executive Director

**Re: Actuarial Analysis of Proposed Combined Contribution Rates for the
City of Fayetteville Paid and Volunteer Fire**

Dear Mr. Clark:

As requested, enclosed are the results of actuarial valuations which determine the combined employer contribution rates which would result from having the City of Fayetteville Paid and Volunteer Firemen's "closed plan" (The Local Relief and Pension Fund for Employees Hired Before January 1, 1983) administered by the Arkansas Local Police and Fire Retirement System (LOPFI).

Please call if you have any questions or comments.

Respectfully submitted,

David L. Hoffman

Heidi G. Barry, ASA, MAAA

DLH/HGB:sc
Enclosure

**ARKANSAS LOCAL POLICE AND FIRE RETIREMENT SYSTEM
CITY OF FAYETTEVILLE PAID AND VOLUNTEER FIRE
ACTUARIAL VALUATION OF PROPOSALS UNDER CONSIDERATION
AS OF DECEMBER 31, 2014**

Requested By: Mr. David B. Clark, Executive Director
Arkansas Local Police and Fire Retirement System

Date: June 10, 2015

Submitted By: David L. Hoffman and Heidi G. Barry, ASA, MAAA
Gabriel, Roeder, Smith & Company

Submitted in this report are the results of actuarial valuations which determine the combined employer contribution rates which would result from having the City of Fayetteville Paid and Volunteer Firemen's "closed plan" (The Local Relief and Pension Fund for Employees Hired Before January 1, 1983) administered by the Arkansas Local Police and Fire Retirement System (LOPFI).

The date of the study was as of December 31, 2014. This supplemental valuation does not predict the result of the December 31, 2015 valuation or of any other future actuarial valuation. (Future activities can affect future valuation results in an unpredictable manner.) Rather, the supplemental valuation gives an indication of the probable effect of the proposed changes on future valuations without comment on the complete end result of the future valuations.

In accordance with LOPFI Board policy, the employer contribution rates established by this valuation report are valid for purposes of joining the System until October 30, 2015.

This report is intended to describe the financial effect of the proposed plan changes. No statement in this report is intended to be interpreted as a recommendation in favor of the changes, or in opposition to them.

Heidi G. Barry is a Member of the American Academy of Actuaries (MAAA) and meets the Qualification Standards of the American Academy of Actuaries required to render the actuarial opinion contained herein.

The calculations are based upon assumptions regarding future events, which may or may not materialize. They are also based upon present and proposed plan provisions that are outlined in the report. If you have reason to believe that the assumptions that were used are unreasonable, that the plan provisions are incorrectly described, that important plan provisions relevant to this proposal are not described, or that conditions have changed since the calculations were made, you should contact the authors of this report prior to relying on information in the report.

If you have reason to believe that the information provided in this report is inaccurate, or is in any way incomplete, or if you need further information in order to make an informed decision on the subject matter of this report, please contact the authors of the report prior to making such decision.

In the event that more than one plan change is being considered, it is very important to remember that the results of separate actuarial valuations cannot generally be added together to produce a correct estimate of the combined effect of all of the changes. The total can be considerably greater than the sum of the parts due to the interaction of various plan provisions with each other, and with the assumptions that must be used.

**ARKANSAS LOCAL POLICE AND FIRE RETIREMENT SYSTEM
CITY OF FAYETTEVILLE PAID AND VOLUNTEER FIRE
ACTUARIAL VALUATION OF PROPOSALS UNDER CONSIDERATION
AS OF DECEMBER 31, 2014**

The actuarial methods and assumptions were the same as those used in the regular valuation as of December 31, 2014. In particular, the economic assumptions used in the supplemental actuarial valuation were net investment return of 8.0% per year and wage inflation of 4.0% (price inflation of 3.0%) per year.

Member information is summarized in the following table:

Group	Valuation Data							
	Active Members	Payroll	Averages			Retired Members	Monthly Benefit	Average Age (Yrs.)
			Pay	Age (Yrs.)	Serv. (Yrs.)			
Paid								
LOPFI	106	\$ 6,079,826	\$ 57,357	37.7	16.0	57	\$ 87,753	49.3
LOPFI DROP	2	72,893	36,447	58.3	14.0	2	3,523	58.3

Total	-	N/A	N/A	N/A	N/A	6	683	82.8

Major Local Fund Benefit Provisions:

Voluntary Retirement - Eligibility at 20 years of service regardless of age.

Paid: Annual benefit is equal to 90% of the highest year's pay. If the member has acquired more than 20 years of service credit, the benefit is increased by \$240 annually for each additional year of service credit (to a maximum annual addition of \$1,200). If acquired more than 25 years of service credit, the benefit is increased at age 60 by 1.25 % of highest year's pay for service over 25 years. (Maximum benefit is 100% of final salary).

Volunteer: The minimum benefit for volunteer members is \$1,200 per year. If the member has acquired more than 20 years of service credit, the benefit is increased by \$120 annually for each additional year of service credit (to a maximum annual addition of \$600).

Member Contributions – 6.0% of salary for paid members. \$12 per year for volunteer members. Member contributions are refundable without interest if termination of employment occurs before monthly benefits are payable.

Automatic post-retirement benefit increases – None.

PAID FIRE RESULTS

Asset information:

Asset information of the Local Pension & Relief Fund was derived from the Fund's annual financial report provided to us. The date of the report was December 31, 2014. The reported market value of assets, \$4,377,557, for the Local Fund, as of December 31, 2014 was used in computing the employer contribution rates. For purposes of our calculations, we assumed that the \$4,377,557 Local Fund balance was \$4,361,699 for paid members and \$15,858 for volunteer members. The computed employer contribution rates are sensitive to changes in overall asset value. The actual amount transferred to LOPFI will depend on the market value of Local Fund assets when they are actually liquidated and may differ substantially from the value as of December 31, 2014. This will likely impact the actual rate computed in the next valuation of the combined plans.

Results:

	No COLA	3% COLA
Actuarial Accrued Liabilities (AAL)

**ARKANSAS LOCAL POLICE AND FIRE RETIREMENT SYSTEM
CITY OF FAYETTEVILLE PAID AND VOLUNTEER FIRE
ACTUARIAL VALUATION OF PROPOSALS UNDER CONSIDERATION
AS OF DECEMBER 31, 2014**

**15-YEAR AMORTIZATION, 0% COLA
ACTUARIAL STATEMENT**

Proposed Provisions:

No post-retirement benefit increases for Local Plan members with unfunded liabilities amortized over a 15-year closed period.

Actuarial Information:

The following shows the computed employer contribution rate applicable to Local Plan unfunded liabilities:

Contributions for	FY 2015 & 2016 Computed Employer Contributions as Percent of Payroll Local Plan Only
Normal Cost	0.00%
Unfunded Accrued Liabilities	<u>12.46</u>
Total	12.46%

Comment A — The computed employer contribution for LOPFI only for calendar years 2015 and 2016 is 24.50% of active member payroll. The combined annual employer contribution, if the Local Plan comes under LOPFI administration, would be 36.96% for calendar years 2015 and 2016.

Comment B — The results shown above are based on the December 31, 2014 actuarial valuation. If the fund comes under LOPFI administration in 2015, the December 31, 2015 valuation will determine the calendar year 2017 employer rate. The 2017 employer rate and future employer rates are likely to differ from rates above reflecting actual investment return and mortality experience.

Comment C — As noted earlier, these calculations are based on future events that may or may not materialize. Readers of this report may have an expectation that the contribution shown above will be paid for 15 years and the employer will be relieved of all liability at that time. That is not the case. As long as benefits are payable there is a possibility that employer contributions will be needed.

**ARKANSAS LOCAL POLICE AND FIRE RETIREMENT SYSTEM
CITY OF FAYETTEVILLE PAID AND VOLUNTEER FIRE
ACTUARIAL VALUATION OF PROPOSALS UNDER CONSIDERATION
AS OF DECEMBER 31, 2014**

**25-YEAR AMORTIZATION, 0% COLA
ACTUARIAL STATEMENT**

Proposed Provisions:

No post-retirement benefit increases for Local Plan members with unfunded liabilities amortized over a 25-year closed period.

Actuarial Information:

The following shows the computed employer contribution rate applicable to Local Plan unfunded liabilities:

Contributions for	FY 2015 & 2016 Computed Employer Contributions as Percent of Payroll Local Plan Only
Normal Cost	0.00%
Unfunded Accrued Liabilities	<u>8.87</u>
Total	8.87%

Comment A — The computed employer contribution for LOPFI only for calendar years 2015 and 2016 is 24.50% of active member payroll. The combined annual employer contribution, if the Local Plan comes under LOPFI administration, would be 33.37% for calendar years 2015 and 2016.

Comment B — The results shown above are based on the December 31, 2014 actuarial valuation. If the fund comes under LOPFI administration in 2015, the December 31, 2015 valuation will determine the calendar year 2017 employer rate. The 2017 employer rate and future employer rates are likely to differ from rates above reflecting actual investment return and mortality experience.

Comment C — As noted earlier, these calculations are based on future events that may or may not materialize. Readers of this report may have an expectation that the contribution shown above will be paid for 15 years and the employer will be relieved of all liability at that time. That is not the case. As long as benefits are payable there is a possibility that employer contributions will be needed.

Comment D — The reader should note that the cash flow projection on page 10 shows the group running out of money and therefore borrowing from LOPFI for a number of years. The financial reporting for this group will be affected significantly as a result.

1. LOPFI Active member count is assumed to stay level in future years.
2. Local plan contributions only; 12.46% of pay in 2015 and thereafter in addition to the LOPFI rate. The first year contribution assumes that the City will be under LOPFI administration for the last six months of 2015. The last year contribution based on a 15-year amortization schedule would be applied to calendar year 2030.
3. Reported market value of assets. Assets are projected at the assumed rate of return of 8% per year.

Note: The actual future contributions for this group are affected by investment return, number of active members and life expectancy. This projection does not show the effect on future employer contributions of differences between actual and assumed future experience. These differences can have a significant effect on these results.

1. LOPFI Active member count is assumed to stay level in future years.
2. Local plan contributions only; 8.87% of pay in 2015 and thereafter in addition to the LOPFI rate. The first year contribution assumes that the City will be under LOPFI administration for the last six months of 2015. The last year contribution based on a 25-year amortization schedule would be applied to calendar year 2040.
3. Reported market value of assets. Assets are projected at the assumed rate of return of 8% per year.

Note: The actual future contributions for this group are affected by investment return, number of active members and life expectancy. This projection does not show the effect on future employer contributions of differences between actual and assumed future experience. These differences can have a significant effect on these results.

VOLUNTEER FIRE RESULTS

Asset information:

Asset information on the Local Pension & Relief Fund was derived from the Fund's annual financial report provided to us. The date of the report was December 31, 2014. The reported market value of assets, \$4,377,557, for the Local Fund, as of December 31, 2014 was used in computing the employer contribution rates. For purposes of our calculations, we assumed that the \$4,377,557 Local Fund balance was \$4,361,699 for paid members and \$15,858 for volunteer members. The computed employer contribution rates are sensitive to changes in overall asset value. The actual amount transferred to LOPFI will depend on the market value of Local Fund assets when they are actually liquidated and may differ substantially from the value as of December 31, 2014. This will likely impact the actual rate computed in the next valuation of the combined plans.

Results:

ACTUARIAL VALUATION OF PROPOSALS UNDER CONSIDERATION
AS OF DECEMBER 31, 2014**

VOLUNTEER FIRE RESULTS

If the Local Fund becomes administered by LOPFI, the per month employer contribution* for calendar year 2015 and thereafter would be as follows:

COLA	15-Year Amortization Period	25-Year Amortization Period
	Computed Employer Contribution	Computed Employer Contribution
0.00%	\$ 314.72	\$ 253.78
3.00%	394.88	318.42

These contributions are in addition to the contribution determined for LOPFI members only. As of December 31, 2014 there are no LOPFI Volunteer Firemen. These are the estimated contributions needed to pay off the unfunded accrued liability associated with Closed Plan benefits and would be deposited in the Local Fund Employer Accumulation Account.

Readers of this report may have an expectation that the contribution shown above will be paid for 15 or 25 years and the employer will be relieved of all liability at that time. That is not the case, as long as benefits are payable there is a possibility that employer contributions will be needed.

* Contributions were calculated on a dollars per month basis since there are no active volunteers in LOPFI and the Local Plan to calculate a per member per month rate.

1. As of December 31, 2014 there were no Active LOPFI Volunteer Firemen.
2. Local plan contributions only; \$314.72 per month in 2015 and thereafter in addition to the LOPFI rate. The first year contribution assumes that the City will be under LOPFI administration for the last six months of 2015. The last year contribution based on a 15-year amortization schedule would be applied to calendar year 2030.
3. Reported market value of assets. Assets are projected at the assumed rate of return of 8% per year.

Note: The actual future contributions for this group are affected by investment return, number of active members and life expectancy. This projection does not show the effect on future employer contributions of differences between actual and assumed future experience. These differences can have a significant effect on these results.

Resolution to Assign Local Plan Administration to LOPFI

Whereas, the Board of Trustees (the Board) of the FAYETTEVILLE FIRE Pension and Relief Fund (the Local Plan), desires to assign administration of the Local Plan to the Arkansas Local Police and Fire Retirement System (LOPFI) pursuant to Act 364 of 1981, as amended; and

Whereas, such action shall not change the benefit structure unless a benefit increase is approved by the governing body of FAYETTEVILLE, Arkansas; and

Whereas, the Board received and reviewed the latest actuarial report from LOPFI, which states the initial required employer contribution rate(s); and

Whereas, LOPFI will administer the Local Plan at an annual cost not to exceed ½ of 1% of active member payroll plus 1% of average annual assets of the Local Plan; and

Whereas, the Board finds it is in the best interest of the Local Plan and its participants to have LOPFI administer the Local Plan; therefore,

BE IT RESOLVED, the Board hereby elects to assign administration of the Local Plan to LOPFI.

BE IT FURTHER RESOLVED the Board requests the CITY OF FAYETTEVILLE, a political subdivision of the State of Arkansas, to act as its agent henceforth.

BE IT FURTHER RESOLVED the Board understands any agreement to administer the Local Plan by LOPFI shall be entered into by and with the governing body of FAYETTEVILLE, Arkansas, as the Board's agent, and that such agreement shall dissolve said Board of Trustees.

CERTIFICATION

We certify this Resolution accurately states the action of said Board of Trustees. Approved this ____ day of _____, 2015.

ORDINANCE NO. _____

AN ORDINANCE TRANSFERRING ADMINISTRATION OF RETIREMENT COVERAGE FOR ELIGIBLE MEMBERS OF THE FAYETTEVILLE FIRE PENSION AND RELIEF FUND TO THE ARKANSAS LOCAL POLICE AND FIRE RETIREMENT SYSTEM (LOPFI) AND AUTHORIZING THE CHIEF ADMINISTRATIVE OFFICER TO ENTER INTO AN IRREVOCABLE AGREEMENT WITH LOPFI.

WHEREAS, the Board of Trustees of the FAYETTEVILLE Fire Pension and Relief Fund has elected to have its Pension Fund administered by LOPFI as stated by Resolution dated _____, 2015, and that

WHEREAS, the Board of Trustees has requested by Resolution that the City of FAYETTEVILLE, Arkansas to act as its agent henceforth.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF FAYETTEVILLE, ARKANSAS:

SECTION 1. If accepted by LOPFI, the administration of the FAYETTEVILLE Fire Pension and Relief Fund shall be transferred to LOPFI under authority of Act 364 of 1981, as amended. Such transfer shall mean the administration of the Pension Fund only and not a change in the Pension Fund's benefit program unless a benefit increase is approved by the City of FAYETTEVILLE, Arkansas.

SECTION 2. The Chief Administrative Officer is hereby authorized to enter into an irrevocable agreement, *using a fifteen (15) or twenty-five (25) year amortization schedule (drafter of Ordinance needs to select one amortization period)*, with LOPFI to administer the FAYETTEVILLE Fire Pension and Relief Fund as stated in Section 1 hereof.

SECTION 3. It is the intent of the City Council and it is hereby ordained that the provisions of this Ordinance shall be codified into the Code of Ordinances of FAYETTEVILLE, Arkansas and the sections thereof may be re-numbered and re-lettered as necessary to accomplish such intention.

SECTION 4. Due to the need to consolidate administration of the FAYETTEVILLE Fire Pension and Relief Fund with LOPFI, an emergency is hereby declared to exist and this Ordinance shall be in full force from and after the date of its passage and approval.

ADMINISTRATIVE SERVICES AGREEMENT

This Administrative Services Agreement (Agreement) is entered into by and between the ARKANSAS LOCAL POLICE AND FIRE RETIREMENT SYSTEM (LOPFI) and the CITY OF FAYETTEVILLE for the benefit of its FIRE Pension and Relief Fund (Fire Pension Fund).

PARTIES

The City of FAYETTEVILLE, a political subdivision, currently has and administers a Fire Pension Fund.

LOPFI is an agency created by statute (A.C.A. 24-10-101, et. seq.) for the purpose of providing a statewide retirement system with pooled administration.

The Mayor and City Council of FAYETTEVILLE desire to enter into an irrevocable Agreement with LOPFI to administer its Fire Pension Fund and in consideration of the mutual obligations hereinafter enumerated the parties agree as follows:

1. This Agreement is made pursuant to the authority of Act 364 of 1981, as amended, of the General Assembly of the State of Arkansas.
2. This Agreement shall be effective sixty (60) days from the date affixed hereto, provided, however, at any time during the sixty (60) day period the LOPFI Board of Trustees may reject this Agreement.
3. This Agreement is for the administration of the Fire Pension Fund and its benefit structure shall not change, unless a benefit increase is approved by the City of FAYETTEVILLE.
4. The actuaries for LOPFI have computed an initial employer contribution rate(s) to be paid by the City of FAYETTEVILLE to support the benefits paid by the Fire Pension Fund and will provide eligible participants with the benefits described in Act 397 of 1983 (applies to Fire plans). The City of FAYETTEVILLE agrees to always remit payment at the level established by the actuaries for LOPFI.
5. The annual fee paid to LOPFI for administration of the Fire Pension Fund shall not exceed one half (1/2) of one percent (1%) of the annual payroll of the Fire Pension Fund and one percent (1%) of the average annual Fire Pension Fund assets. However, this fee is subject to change by legislative action. The fiscal year shall be January 1 through December 31.
6. Benefits and member refunds shall be paid on the first business day of each month and in accordance with LOPFI procedures.

7. LOPFI covenants and agrees to provide the following services:
 - a. investment of Fire Pension Fund assets and the award of annual interest to the employer reserve account at the end of each fiscal year in an amount consistent with the interest awarded to other LOPFI employer accounts;
 - b. process retirement applications including determination of eligibility, calculation of service credit and benefit payment amounts, payment of benefits to eligible benefit recipients, and satisfaction of state and federal tax withholding requirements, all in accordance with LOPFI procedures and guidelines;
 - c. disability determinations, provided the employer submits appropriate materials for said determinations. All disability determinations shall conform to LOPFI procedures;
 - d. refund of member contributions to eligible terminating members; and

8. The City of FAYETTEVILLE covenants and agrees as follows:
 - a. upon execution of this Agreement all Fire Pension Fund assets and records shall be transferred to LOPFI. In the sole discretion of LOPFI certain investments may be allowed to mature to avoid penalties;
 - b. all employer and applicable employee contributions shall be remitted to LOPFI in time to be recorded by the tenth (10th) day of each month following the month in which services were rendered. Remittance shall be made in the manner and amounts prescribed by LOPFI, which shall include the use of LOPFI's electronic reporting and LOPFI's e-Payment;
 - c. the City of FAYETTEVILLE shall execute all documents required by LOPFI to aid in the administrative process;
 - d. all active members and beneficiaries of the Fire Pension Fund have been deemed eligible pursuant to the standards prevailing at the time of the determination of eligibility. The parties agree that LOPFI is bound by any determination of eligibility or ineligibility made by the Board of Trustees of the Fire Pension Fund as long as such determination(s) conform to state law. The Fire Pension Fund and the City of FAYETTEVILLE indemnify and hold LOPFI harmless for any eligibility decisions made by the Fire Pension Fund.
 - e. the City of FAYETTEVILLE has disclosed to LOPFI all pending claims, actions, suits, and threatened liabilities to the Fire Pension Fund.

9. Upon the passage of sixty (60) days following the execution of this document, unless rejected by the LOPFI Board of Trustees, this Agreement shall become permanent.

Re: 2014 Annual Actuarial Valuation

Date: May 11, 2015

Under state law the actuary for the PRB tests each local fire and police pension fund for actuarial soundness. The PRB uses an annual valuation cycle to assist each Local Plan in monitoring the funding progress of their plan. The enclosed valuation for December 31, 2014, answers the following questions about your plan:

	<u>YES</u>	<u>NO</u>
1. Does income meet or exceed the Necessary Employer Contribution (see page 4)?		XX

Board of Trustees
Fayetteville Firefighters Pension Fund

Gentlemen:

This report presents the results of our actuarial valuation of the assets and liabilities of the Fayetteville Firefighters Pension Fund as of December 31, 2014.

This valuation is required by Arkansas Code Annotated 24-11-205. The purpose of this report is to (1) evaluate the actuarial status of the Fund, (2) determine the level contribution requirement needed, (3) review the development of the Fund over the past several years, and (4) present certain actuarial items on page 9 for disclosure under Governmental Accounting Standards. This report is not intended for any other purpose.

The Arkansas Fire & Police Pension Review Board reviewed the experience study we performed and a change in the assumed interest discount rate was made to 5%. If your plan assumed something other than 5% in previous valuations, the effect of this change in assumption is disclosed on page 5 of this report.

The implementation of Governmental Accounting Standards Board Statement No. 67 (GASB 67) is included in this report for the first time. GASB 68 will be added in the next valuation report. There are four Appendices added to this report to disclose the necessary items for GASB 67.

The member and financial information used in this report was supplied by the Arkansas Fire & Police Pension Review Board. We did not audit this information, although we did review it for reasonableness and consistency.

I certify that this report has been prepared in accordance with generally accepted actuarial principles and practices. In my opinion, the actuarial methods used are appropriate and the actuarial assumptions produce results which, in the aggregate, are reasonable.

Sincerely,

Jody Carreiro, A.S.A., M.A.A.A.
Actuary

EXHIBIT 1

CONTRIBUTIONS

The following contribution level reflects the payment of the current year Normal Cost for benefits attributable to said year (see Exhibit 2) plus an amount sufficient to pay off the Unfunded Actuarial Liability over a 5-year period. These costs DO NOT include the contributions due to the Local Police and Firefighters Retirement System ("LOPFI") for persons hired after 1982.

	<u>Full Paid</u>	<u>Volunteer or Part-Paid</u>	<u>Total</u>
2015 Necessary Annual Contribution to pay:			
1 Normal Cost, plus	\$ 0	\$ 0	\$ 0
2 Pay off the Unfunded Actuarial Accrued Liability	<u>3,214,908</u>	<u>11,271</u>	<u>3,226,179</u>
3 Total necessary	\$ 3,214,908	\$ 11,271	\$ 3,226,179
Less			
4 Expected Employee Contribution (6.00% of salary. \$12 per active volunteer)	<u>- 0</u>	<u>- 0</u>	<u>- 0</u>
Necessary Employer Contribution (This is the amount needed in addition to investment income)	<u>\$ 3,214,908</u>	<u>\$ 11,271</u>	<u>\$ 3,226,179</u>
Covered Payroll	\$ 0	N/A	\$ 0
Necessary Employer Rate	<u>N/A</u>	<u>\$ N/A</u>	<u>N/A</u>

These contributions assume that the dollar contribution grows at a rate of 4% per year. The contributions are assumed to be made continuously throughout the year.

The actual 2014 contribution was \$756,819 from the employer.

4. Actuarial Value of Assets, End of year (1 + 2 + 3(f))	4,048,620	4,280,264	4,514,274	5,244,338	6,054,749
5. Net Investment Return on the Actuarial Value of Assets	9.4%	9.8%	-1.0%	-0.1%	1.6%

Note: The Pension Review Board's Board Rule #11 first applies this methodology to determine the Actuarial Value of Assets for the 12/31/99 actuarial valuation report. Different methods were used to determine the Actuarial Value of Assets for the 12/31/98 and earlier reports.

EXHIBIT 3 (Continued)

ACCOUNTING INFORMATION

This page is included to provide the information required by the Governmental Accounting Standards Board Statement No. 25 and 27. The values below are based on the assumptions contained in Exhibit 8.

The Annual Pension Cost disclosed in this exhibit will almost always differ from the actual cash contribution to the fund. We must emphasize that these disclosures are shown in the city's financial statements; Sound actuarial projections should be used to determine the actual cash contribution requirements.

RECONCILIATION OF NET PENSION OBLIGATION (NPO)

EXHIBIT 5

SHORT CONDITION TEST

The Arkansas General Assembly has stated that the funding objective for these plans is to pay for benefits with contributions that remain level as a percentage of employee payroll. Thus, the long-term condition test is met when the actual contributions are fairly level and are paid when due.

A short condition test can be used to measure a plan's progress. Under the short condition test, the fund's assets are compared with:

- 1) Active member contributions;
- 2) The liabilities for future benefits to the present retirees and inactive members;
- 3) The liabilities for service already rendered by active members.

If the plan has been following level cost funding, liability (1) and liability (2) above will almost always be fully covered by the rest of the present assets. In addition, liability (3) above will at least partially funded. The larger the funded portion of liability (3), the stronger the condition of the fund. For a closed fund i.e., one like yours, where no new members are admitted, the funded portion of liability (3) should be steadily increasing.

The following table illustrates the history of the short condition test for this plan:

Valuation Date	<u>Computed Actuarial Liabilities</u>			Valuation Assets	<u>Portion of Liabilities covered by Assets</u>		
	(1) Active Members Contributions	(2) Retirees, Inactives, and DROPS	(3) Actives-Employer Financed		(1)	(2)	(3)
12/31/1984	236,541	1,464,696	2,571,042	3,078,619	100%	100%	54%

EXHIBIT 7

PRINCIPLE PROVISIONS OF THE PLAN

<u>EMPLOYEE</u>	Member of Fire Department
<u>EMPLOYER</u>	Fayetteville Fire Department
<u>MEMBERSHIP</u>	Condition of Employment. Firefighters hired after 1982 must join the statewide Local Police and Firefighters Retirement System
<u>CREDITABLE SERVICE</u>	Determined on basis of service since employment
<u>CONTRIBUTIONS</u>	
<u>Employee</u>	6% of salary. Volunteers contribute \$12/year. Refundable if member terminates before retirement eligibility.
<u>Employer</u>	<ol style="list-style-type: none">1. Matching contribution equal to employee contribution2. State Insurance Premium Tax turnback3. Local Millage
<u>FINAL SALARY</u>	Salary attached to the rank of the member at time of retirement, based on regularly scheduled work-week.
<u>DEFERRED RETIREMENT OPTION PLAN</u>	This plan has elected to participate in the Deferred Retirement Option Plan effective 01/25/1996. Members who elect to participate have a DROP account that is increased by the monthly amount of their retirement as if they had retired as of the date DROP was elected. Has not elected coverage under Act 1457 of 1999.
<u>RETIREMENT BENEFITS</u>	
<u>Eligibility</u>	20 Years of Service regardless of age.
<u>Benefit</u>	90% of Final Salary, but not less than \$4,200. (\$1,200/year for volunteer/part-paid). If service exceeds 20 years, the annual benefit is increased by \$240 for each year over 20, up to \$1,200/year extra. (\$120 for each year over 20 up to \$600/year for volunteer/part-paid). If service is more than 25 years, member receives an extra 1.25% (for each year over 25) of Final Salary, payable once the retiree reaches age 60. The benefit cannot exceed 100% of Final Salary.

EXHIBIT 7 (Continued)

DEATH BENEFITS

Eligibility

Death before 20 Years of Service not occurring while performing work in gainful employment outside the fire department, or death after 20 years.

Benefit

1. Widow receives same amount as member is receiving or eligible for.
2. Each child under age 19 receives \$1,500/year. (\$300/year for volunteer/part-paid). If no surviving spouse, child receives spouse's benefit to age 19.

DISABILITY BENEFITS

Eligibility

Permanent physical or mental disability not acquired while performing work in gainful employment outside the fire department.

Benefit

Full Paid Non-duty disability

Retirement benefit but not less than \$4,200/year.

Full Paid Duty related disability

Retirement benefit but not less than 65% of Final Salary and not less than \$4,200/year.

Volunteer/Part-Paid:

Computed as voluntary retirement benefit

EXHIBIT 8

ACTUARIAL METHODS AND ASSUMPTIONS

The assumptions for this valuation have been selected in accordance with Actuarial Standards of Practice No. 27. The asset valuation method is prescribed in Arkansas Code Annotated 24-11-207. This prescribed asset valuation method directly impacts the investment return assumption. The assumed salary growth is restricted by A.C.A. 24-11-205 in relation to the investment return assumption.

ACTUARIAL COST METHOD

The "entry age normal" cost method has been used.

PRE-RETIREMENT MORTALITY

Deaths have been projected on the basis of the 1983 Group Annuity Table for Males, set back five years for females. Mortality rates at a few sample ages are:

<u>Age</u>	<u>Mortality rate per 1,000</u>
25	0.464
35	0.860
45	2.183
55	6.131

POST RETIREMENT MORTALITY

The 1983 Group Annuity Mortality Table was used. For females, the male table was used with a five-year setback. The life expectancy according to this table is as follows:

<u>Age</u>	<u>Males</u>	<u>Females</u>
55	24.87	29.23
65	16.74	20.68

MORTALITY BASIS AND PROJECTION

The mortality assumptions do not include a projection for mortality improvement. These rates were chosen after an experience study for 2007-2012. No projection was deemed necessary at this time since the recent experience study did not show significant improvement over an experience study for 2000-2006 deaths.

The 1971 Group Annuity Table for Males, set back five years for females was used before the 12/31/2007 Valuation.

VOLUNTARY TERMINATIONS

Annual termination rates at a few sample ages are:

<u>Age</u>	<u>Termination rate per 1,000</u>
20	40
25	35
30	29
35	15
40	6
45	5
50	5
55	5

EXHIBIT 8 (continued)

When a person had less than 4 years of service, we assumed that his chances of voluntary termination were a multiple of thereafter rates, with the following multiples being used:

1st year	2.85
2nd year	2.00
3rd year	1.50
4th year	1.15

ASSUMED DISCOUNT RATE

5.0%

The reports for the valuations as of 12/31/2009 through 12/31/2012 were completed using an assumed discount rate of 5%.

A study of the returns of all fire and police plans was made of the 2006-2012 experience. The components and variations of appropriate portfolios were also reviewed. The Pension Review Board determined that for comparison with previous years and with other similar plans that a single discount assumption of 5% should be used.

DISABILITIES

We continued the disability rates used in prior reports. Disability rates at a few sample ages are:

<u>Age</u>	<u>Disability rate per 1,000</u>
20	0.8
25	0.8
30	0.8
35	0.8
40	2.0
45	2.6
50	4.9
55	8.9
60	14.1

One third of the disabilities were assumed to be service related.

For mortality after disability, we assumed rates based on the Eleventh Actuarial Valuation of the Railroad Retirement System, for occupational disabilities

ASSET VALUATION

See Exhibit 3, Part J

EXHIBIT 8 (continued)

SALARY GROWTH

We have used the salary scale used in prior reports. Annual assumed growth at a few sample ages is:

<u>Age</u>	<u>ANNUAL SALARY INCREASE</u>		
	<u>Base</u>	<u>Merit</u>	<u>Total</u>
20	4.0%	4.0%	8.0%
25	4.0%	3.2%	7.2%
30	4.0%	2.8%	6.8%
35	4.0%	2.5%	6.5%
40	4.0%	2.2%	6.2%
45	4.0%	1.7%	5.7%
50	4.0%	1.2%	5.2%
55	4.0%	0.7%	4.7%
60	4.0%	0.2%	4.2%

EXPECTED RETIREMENT AND DROP PATTERN

Since the plan allows full benefits at ages younger than the traditional "65", an assumption that will have an important impact is what percentage of people who are eligible for this early retirement will actually take advantage of it.

This will depend on intangible things such as the economy, health, financial ability to retire, Social Security eligibility, and work patterns. Based on recent experience, we are using the following assumed rates:

<u>Age</u>	<u>Retirement rate per 1,000</u>	
	<u>Retirement</u>	<u>DROP</u>
40-59	100	200
60+	1,000	0

Note: A member was assumed to be eligible for retirement or DROP after attaining age 40 with 20 years of service. It is also assumed that twice the normal number will retire or elect DROP in the first year of eligibility.

EXHIBIT 8 (continued)

RETIREMENT PATTERN AFTER
ELECTION OF DROP

Once a person is on DROP (Deferred Retirement Option Program), they were assumed to retire from the department as follows:

<u>Years on DROP</u>	<u>Retirement rate per 1,000</u>
1	100
2	200
3	200
4	300
5 or more	1,000

APPENDIX 1

Discussion of GASB 67

Accounting Standard

For pension plans that are administered through trusts or equivalent arrangements, Governmental Accounting Standards Board (GASB) Statement No. 67, "Financial Reporting for Pension Plans," (GASB 67) replaces Statements No. 25 and No. 50. GASB 67 establishes standards of financial reporting and specifies the required approach for measuring the pension liability of employers for benefits provided through the pension plan.

This discussion provides a summary of the information that is required to be disclosed under GASB 67. A number of these disclosure items are provided in this report as noted. However, certain information, such as notes regarding accounting policies and investments, is not included in this report, and your internal staff will be responsible for preparing that information to fully comply with this accounting standard.

Financial Statements

GASB 67 requires defined benefit pension plans to present two financial statements: a statement of fiduciary plan net position and a statement of changes in fiduciary plan net position. Based on the information that was provided to our firm, we compiled the Financial Statements that are included in this report as Exhibit 3.

Notes to Financial Statements

Paragraph 30 of GASB 67 is an extensive list of notes to the plan's financial statements that are required to provide additional disclosure. Many of these notes concern the plan provisions and the actuarial assumptions used in making the calculations under this standard. Those items are included as Exhibits 7 and 8 in this report.

Please note that several items mentioned in Paragraph 30 are beyond the scope of the included information. Your internal staff will be responsible for preparing those notes.

This report includes some notes that are actuarial in nature and are written in the format we understand is desired by GASB 67. These notes are included as Appendix 2 of this report. These are only selected notes and not intended to be a complete compilation of notes to the financial statements.

Required Supplementary Information

GASB 67 requires a 10-fiscal year history of various information about the pension liability. These schedules may be built prospectively since the presentation is not the same as all previous years under previous standards. The four schedules are:

- Schedule of changes in the net pension liability.
- Schedule of the components of net pension liability along with related ratios.
- Comparison of actual employer contributions to the actuarially determined contributions based on the plan's funding policy.
- Schedule of the annual money-weighted rate of return on pension plan investments.

These compilations can be found in Appendix 4 of this report. Please note that the money-weighted rate of return schedule is based on all transactions occurring at mid-year. The standard calls for a monthly calculation of the weighted, but we do not have the data sufficient to make that calculation.

Single Discount Rate

Projected benefit payments are required to be discounted to actuarial present values using a single discount rate that reflects (1) a long-term expected rate of return on pension plan investments (to the extent that the plan's fiduciary net position is projected to be sufficient to pay benefits) and (2) a tax-exempt municipal bond rate based on an index of 20-year general obligation bonds with an average AA credit rating as of the measurement date (to the extent that the plan's net position with contributions associated with current plan member and the long-term expected rate of return are not sufficient to pay benefits).

For the purpose of this valuation, the expected rate of return on pension plan investments is 5.0%; the municipal bond rate is 4.29%; and the resulting single discount rate is 4.4224%. The resulting demonstration of the single discount rate calculation is shown in Appendix 4.

Valuation Date, Effective Date and Transition

GASB 67 is effective for fiscal years beginning after June 15, 2013. Since the fiscal year under consideration for this report is 2014, the corresponding financial statement covers the fiscal year from January 1, 2014 to December 31, 2014. We understand that the plan fiscal year and the employer's fiscal year are the same. Therefore, the calculations included in this report are not projected and reflect the beginning and the end of the above stated fiscal year.

APPENDIX 2

Notes to the Financial Statements

Cost of Living Adjustment (COLA)

The board of trustees has the ability to make ad hoc cost of living adjustments (COLA) and other benefit improvements through a process that requires actuarial soundness and approval by the Pension Review Board. Therefore, in the opinion of the actuary, any increases are not substantively automatic, and no COLA is included in the determination of the Total Pension Liability.

Long-Term Expected Return on Plan Assets

The long-term expected rate of return on pension plan investments was determined using a building block method in which best-estimate ranges of expected future real rates of return. The rates were built on a target allocation for all local police and fire pension funds, the target for an individual fund will vary within the guidelines of Arkansas law and regulation. The target allocation and the long-term expected rates of return are shown in the table below:

Asset Class	Target Allocation	Long-term Expected Rate of Return
Domestic Fixed Income	80%	5.0%
International Fixed Income		
Domestic Equity	10%	7.8%
Foreign Equity		
Cash	10%	2.0%
Total	100%	5.0%

Single Discount Rate

A single discount rate of 4.4224% was used to measure the Total Pension Liability. This single discount rate was based on the expected rate of return on pension plan investments of 5.0%. The projection of cash flows, based on the assumptions made, found that the pension plan's net position was insufficient to make all projected future benefit payments of current plan members. Therefore, the single discount rate was applied to all periods of projected benefit payments to determine the Total Pension Liability.

Regarding the sensitivity of the Net Pension Liability to changes in the single discount rate, the follow presents the plan's net pension liability, calculated using a single discount rate of 4.42%, as well as what the plan's net pension liability would be if it were calculated using a single discount rate that is 1-percentage point lower or 1-percentage point higher:

	1% Decrease	Current Single Rate Assumed	1% Increase
Total Pension Liability	21,269,266	19,118,634	17,318,206
Net Pension Liability	16,891,709	14,741,077	12,940,649

APPENDIX 3

Required Supplementary Information

GASB 67 requires a 10-fiscal year history of various information about the pension liability. These schedules may be built prospectively since the presentation is not the same as all previous years under previous standards. The four schedules are:

- Schedule of changes in the net pension liability.
- Schedule of the components of net pension liability along with related ratios.
- Comparison of actual employer contributions to the actuarially determined contributions based on the plan's funding policy.
- Schedule of the annual money-weighted rate of return on pension plan investments.

Please note that the money-weighted rate of return schedule is based on all transactions occurring at mid-year. The standard calls for a monthly calculation of the weighted, but we do not have the data sufficient to make that calculation.

The actuarially determined contribution rate was not calculated in the fashion described historically. Therefore, that schedule will be completed prospectively.

The schedules follow this page.

Appendix 3 – Continued

City of Fayetteville, Arkansas Firefighters Pension Fund
Schedule of Required Supplementary Information
Schedule of Investment Returns

FY ending December 31,	Annual Money-weighted Rate of Return
2005	1.91%
2006	10.13%
2007	7.52%
2008	-18.67%
2009	14.68%
2010	11.06%
2011	4.80%
2012	7.51%
2013	13.45%
2014	8.27%

The amounts shown are net of investment expenses.

The actuary calculated these rates with the information that was provided, therefore, these rates are annual money-weighted. Monthly money-weighted returns are not available.

APPENDIX 4

Calculation of the Single Discount Rate

GASB 67 includes a specific requirement for the discount rate that is used for the purpose of the measurement of the Total Pension Liability. This rate considers the ability of the fund to meet benefit obligations in the future. To make this determination, employer contributions, employee contributions, benefit payments, expenses and investment returns are projected into the future. The Plan Net Position (assets) in future years can then be projected and compared to the obligation to make benefit payments in those years. As long as assets are projected to be on hand in a future year, the assumed valuation discount rate is used. In years where assets are not projected to be sufficient to meet benefit payments, the use of a “risk-free” rate is required. The single discount rate is equivalent to applying these two rates to the benefits that are projected to be paid during the different time periods.

For the purpose of this valuation, the expected rate of return on pension plan investments is 5.0%; the municipal bond rate is 4.29%; and the resulting single discount rate is 4.4224%.

The following tables are shown in this exhibit to provide the background for the development of the single discount rate:

- Projection of Benefit Payments and Actuarially Determined Contributions
- Projection of Contributions. Since this plan is frozen with no new participants, there are no expected contributions projected for new participants
- Projection of Plan Fiduciary Net Position
- Present Values of Projected Benefit Payments

The Local Police and Fire Pension Funds do not have formal funding policies. They typically contribute the amounts required by law as outlined in Exhibit 7. For purposes of this projection, any millage amount is assumed to increase by 1% annually; the premium tax and additional allocation revenues, if any, are changed in proportion to the Net Pension Liability; all other sources are assumed to remain level.

These projections are generated under the guidelines of GASB 67 and the related implementation guide. They should be used solely to determine the single discount rate as defined in the GASB statements. Any implication beyond that determination is beyond the scope of this report.

RE: Questionable legality of the City Council agreeing to assume local police and firemen's pension debts

In reviewing the Fayetteville Firefighters Pension Fund Special Report I received late yesterday afternoon, I noted one very important assumption which I believe is legally incorrect. On Exhibit 1, page 1 under No Changes the report states:

"No Changes. The Pension Fund could continue on the same path that they are currently pursuing. The base benefit projection shows that the Pension Fund would deplete assets in 2020. If you assume the city would then be responsible for the benefit payments, then the additional contributions needed would be benefit payments in excess of millage and premium tax." (emphasis added).

Under one of the **Negative** consequences, the Actuary for the Arkansas Fire and Pension Review Board (PRB) states:

“Negative. If the Fund did deplete its assets, **the City is assumed to be responsible for picking up the benefit payments.** This would be difficult for the City and would be a public relations problem.” (emphasis added).

These highly questionable “assumptions” by the State Pension Relief Board are absolutely critical to your decision whether or not to consolidate the local closed pension plans with the State LOPFI retirement plan (which covers most current fire and police officers). I believe those PRB assumptions are wrong and are made without any reference to any supporting state statute that could require Fayetteville’s taxpayers to pay the debts of the independent Fayetteville Police or Firefighters Pension and Relief Board and pension funds.

I believe and have opined for nine years that “the City of Fayetteville, itself, is **NOT** responsible to make pension payments if the pension fund goes broke. The Pension Board administers the Pension Fund and is responsible to make certain it remains healthy.” City Attorney memo to Police Pension Board of Trustees of October 4, 2006. I warned the Fayetteville Firefighters Pension and Relief Board in my memo of April 28, 2008 that bankruptcy of the pension plan was coming. The result of such a bankruptcy would be that “(a)ll pension benefits will then be drastically reduced placing your pensioners in dire financial straits. Benefits must be reduced to sustainable levels very soon to avoid this train wreck scenario.”

The Fayetteville Firemen’s Pension and Relief Board is independent of the Fayetteville City Council and composed of four retired firefighters (all beneficiaries) and the Mayor as Chair and the City Clerk as Secretary. “The board thus created shall provide for the disbursement of the firemen’s relief and pension fund and shall designate its beneficiaries as directed in the act.” A.C.A. § 24-11-801 (b).

The Fayetteville Firemen’s Pension and Relief Board is statutorily granted many powers including dispensing money from the fund by majority vote (A.C.A. § 24-11-802); making procedure rules {A.C.A. § 24-11-801 (e)}; compelling witnesses to attest and testify {A.C.A. § 24-11-803 (a)(1)(A)}; administering oaths {A.C.A. § 24-11-803 (a)(1)(B)}; disbursing

revenue from the pension fund {A.C.A. § 24-11-803 (b)}; hiring and paying trust administrators (A.C.A. § 24-9-204); and financial advisors.

I found out how independent the Fayetteville Police and Firemen's Pension and Relief Boards were during my last years as an Alderman. Even though the City had not levied any discretionary millage at that time, our local Pension Boards had been sued along with the School District and County for failing to "roll back" their millage in violation of Amendment 59 (now Article 16 § 14 of the *Arkansas Constitution*) when the property valuation had escalated over 10% from the previous year. I felt the proffered defense by the School Board, County and Pension Boards was too weak and that we should accept the reduced settlement offered by the taxpayers' attorney.

So I drafted a Resolution to do so and offered it at the Agenda Session. I was then properly informed that the Pension Boards were independent of the City and City Council and made their own legal decisions so my proposed Resolution could not be considered. I understood and withdrew my request. A couple years later my predecessor then representing the Pension Boards agreed to the final settlement of the Amendment 56 taxpayer suit and I presented his documents for approval of the Pension Boards. These agreements rolled back the millage from .5 to .4 for both Pension Funds and paid the taxpayers' attorney fees.

Later when I believed the County Assessor had misread the Tax Incremental Funding statute and constitutional amendment and misallocated the property tax increment necessary to pay off the TIF bonds, I brought a Declaratory Judgment Action and sued all entities receiving property tax millage including the Fayetteville Police and Firemen's Pension and Relief Boards as separate defendants. These Boards obtained their own lawyer, argued their side of the case and received relief in the final Judgment which resolved that case.

This Declaratory Judgment suit was decided initially at the Circuit Court level, but was modified in the City's, Library's and Pension Boards' favor following appeal to the Arkansas Supreme Court. Thus, **it is crystal**

clear that both the Fayetteville Firemen's Pension and Relief Board and the Fayetteville Police Pension and Relief Board are legally separate and independent governmental entities from the City of Fayetteville.

So why is it so important that the Fayetteville Police and Firemen's Pension Plans are independent, separate governmental entities? I will get to that in a minute when I discuss the most important and costly lawsuit ever filed against Fayetteville. But now, let's look at the state statutes governing Local Firemen's and Police Pension and Relief Boards about what happens if a pension fund runs out of money.

The statutes governing both the local Firemen's and local Police Pension Funds are clear about what happens if the Pension Fund becomes exhausted. Please note that these statutes DO NOT say the city's taxpayers are on the hook to pay anything more than the continuing millage.

"(b) Should the fund provided for in this subchapter be insufficient to make full payment of the amount of pensions to all persons entitled thereto, then the fund shall be prorated among those entitled by the proper authorities as may be deemed just and equitable.

• • •

(d) For the purpose of determining how to prorate benefits, the proration shall be considered just and equitable if:

(1) The board pays the full minimum benefit each month to all eligible beneficiaries until assets in the fund are depleted for the fiscal year, at which time all payments shall cease until revenues are received for the next fiscal year; or

(2) The board decreases all payments to all eligible beneficiaries by an equal proportion for the fiscal year and does not allow the assets in the fund to become fully depleted." A.C.A. § 24-11-807 (b) and (d)(1)(2). **Minimum payments generally-Proration upon insufficiency of fund.**

The local Police Pension and Relief Board is also directed to prorate the benefits if the pension fund becomes depleted and insufficient to pay the full amount of benefits.

“If at any time there should not be sufficient money in the fund to pay each person a full amount to which he or she may be entitled, the beneficiaries shall be paid by prorating the fund available among them.” A.C.A. § 24-11-416. **Proration where fund insufficient.**

In neither of these statutes that describe what is to be done upon bankruptcy of the pension funds are the City or city taxpayers even mentioned. Under current state law, it appears clear that debts or lack of solvency of the local pension funds is **NOT** a Fayetteville debt, but solely the responsibility of the pension boards.

The Arkansas Fire and Pension Review Board and probably some of the local Firemen’s and Police Pension and Relief Boar members are asking the City Council to assume liability for the millions of dollars of shortfall in these pension funds caused when the original retirement benefits were raised by the boards from 50% of ending salary to 90% of ending salary plus surviving spousal and other benefits. Not only would the millions of dollars eventually needed take money away from current employee needs, citizen services and capital improvements, but I am afraid such a decision might be an illegal exaction as violative of the *Arkansas Constitution*.

The City learned a hard and very expensive lesson when we were sued by our sanitation rate payers over the City’s illegal attempt to pay off the failed incinerator bond issue. I studied this debacle which cost our citizens several million dollars in attorneys’ fees when it occurred and vowed to myself to try to prevent its reoccurrence during my service as Fayetteville City Attorney.

The facts of the Incinerator Case and the current proposal to assume and pay the unfunded pension liabilities of our local, closed pension plans are dangerously similar. The City of Fayetteville played a large part both

in the creation of the Northwest Recovery Authority and the Fayetteville Firemen's and Police Pension and Relief Boards. The seven Directors of the Fayetteville Board all also occupied seven of the nine board positions on the Northwest Resource Recovery Authority. The Mayor and City Clerk are a minority on both our local pension boards while the Fayetteville Board of Directors had a super majority on the Resource Recovery Authority.

The Northwest Arkansas Resource Recovery Authority issued about \$16-17 million of bonds to build and install the proposed incinerator. The two local pension boards have a combined actuarial deficit of about that much. The Fayetteville Board of Directors during a quick December 31st meeting approved a contract required by the insurance company insuring the Recovery Authority bonds.

"The changes mandated by the insurance company would require the City of Fayetteville to unconditionally guarantee to collect sanitation fees from its citizens and then to pay over from its sanitation fund a sufficient amount of funds to pay all of the Authority's obligations on the fixed rate bonds The guarantee would be absolute and require that tipping fees be collected and paid over to the Authority from sanitation funds without setoff, abatement, credit, or other reduction so long as the bonds remained unredeemed. Under the mandated changes, the City of Fayetteville could not terminate the agreement even if the Authority were in complete default . . ." *Barnhart v. City of Fayetteville, Ark.*, 321 Ark. 197, 202, 900 S.W. 2d 539, 541 (1995).

The Fayetteville City Attorney at that time had recommended quick approval of this (unconstitutional) contract that was the basis of the illegal exaction as determined by the Arkansas Supreme Court.

"The city attorney for Fayetteville certified to the insurance company that the amendments had been made, were enforceable, and that Fayetteville was obligated to pay not only its own tipping fees but those of West Fork and Washington

County as well, regardless of whether the project was completed or functional and regardless of whether the Authority provided alternative facilities." *Id.*

I will NOT recommend to you to enter into an agreement with the Arkansas Fire and Pension Review Board that could obligate our taxpayers to pay millions of dollars for pension obligations that are currently not our taxpayers' responsibility beyond their .8 mills of property tax paid each year.

The Arkansas Supreme Court determined that the "Authority is a separate governmental entity," even though its Board was clearly controlled by the seven members of the Fayetteville Board of Directors. 321 Ark. at 203, 900 S.W. 2d at 542. Both local pension boards are also separate governmental entities which have a small minority of elected city government members who obviously cannot control these boards. These boards are clearly controlled by the super majorities of retired members/beneficiaries. Thus, these pension boards are even more separate and independent from the City than the Resource Recovery Authority which was dominated by Fayetteville Board Members.

"Even though the City of Fayetteville had no obligation to pay the bonds, it assumed the debt of the Authority, a separate governmental entity, and levied a charge against the residences to pay the Authority's debt. The City was without authority to levy a fee that was to pay the long-term debt of the Authority. Thus, the Ordinance imposing the charge was unlawful."

The Arkansas Supreme Court further stated: "We have long held that a city is not authorized to pay or assume the obligation of a separate governmental entity" *Id.*

The principal holdings of the Incinerator Case was that the City of Fayetteville was constitutionally barred from lending its credit (by agreeing to pay) to bond debt of the Northwest Arkansas Resource Recovery. Unfortunately, the PRB is asking we agree to pay the millions of dollars of

shortfall in the local pension funds which is not our legal responsibility. That I believe would also be unconstitutional.

“(i)t is undisputed that under the terms of the Waste Disposal Agreement, Fayetteville was unconditionally required to pay all of the debt of the Authority, including debt incurred as a result of default by the City of West Fork or Washington County, even if Fayetteville received no services from the Authority. This was in violation of Article 16, section 1, which provides that no municipality shall ever lend its credit for any purpose whatsoever.” *Id.* at 206, 900 S.W. 2d at 543.

I also could find no statutory authority to assign local firemen’s or police pension funds to the Arkansas Local Police and Fire Retirement System except for “small funds” “that cover fewer than five (5) members.” A.C.A. §24-11-406 (a) {for police} and A.C.A. § 24-11-804 (a) {for firefighters}. Both our local pension funds contain many times that number of members so that neither of the above statutes would appear to be applicable to those pension funds nor provide authority to shift the administration responsibility to the Arkansas Local Police and Firemen’s Retirement System (LOPFI).

Therefore, I believe trying to assume the millions of dollars of actuarial debt of the pension plans is not only likely unconstitutional, but may not even be authorized in state statutes. Accordingly, I recommend that the City Council not attempt to transfer the administration of the local pension funds to LOPFI nor assume any of the millions of dollars of likely debt of these funds.

RE: Pending or Threatened Litigation against the City
Potential Illegal Exaction Case if Fire Pension is Consolidated with
LOPFI

Every year I am required to report to our Auditors all pending or threatened litigation that could exceed \$50,000.00 in liability. My most recent report issued on June 16, 2015, showed only *Scotts v. City of Fayetteville* with asserted claims of about \$170,000.00 against the City. Since the Scotts failed to perfect their appeal to the Arkansas Court of Appeals, our victory in our two Motions For Summary Judgment is now final and all liability exposure in that case has ended.

However, if the City Council were to pass the proposed ordinance and agree to the proposed contract to transfer administration of the Closed Fire Pension Fund from its pensioner dominated local board to LOPFI, a new legal liability for the City and our taxpayers would be created. The City Council's action would transfer liability to make all benefit payments for this unsounded pension fund from the local pension board to Fayetteville taxpayers.

As I have repeatedly warned you, such an assumption of liability by the City of the multi-million dollar actuarial debt of the local Fire Pension is **likely an unconstitutional and prohibited extension of the City's credit that could form a basis for a multi-million dollar illegal exaction case against the City.** I would have to immediately inform Grant Thornton, LLP, our Auditors, about this major new litigation liability.

About a quarter century ago, the Fayetteville Board of Directors in a very short Special City Council meeting called for on December 31st quickly agreed to a Waste Disposal Agreement to pay enough to the Northwest Arkansas Resource Recovery Authority to cover its bond payments. The Arkansas Supreme Court held that this agreement "was in violation of *Article 16, section 1*, which provides that no municipality shall ever lend its credit for any purpose whatsoever." *Barnhart v. City of Fayetteville*, 321 Ark. 197, 206, 900 S.W. 2d 539, 543 (1995) (emphasis added).

That terrible mistake led to the ouster of every member of the Fayetteville Board of Directors prior to the normal expiration of their term of office and the waste of more than \$5 million of Fayetteville ratepayer or taxpayer money on attorney fees. It is far too soon to make that same mistake again.

CONCLUSION

The constitutional manner to allow consolidation with LOPFI is to realistically eliminate the likelihood of the pension fund insolvency by the Fayetteville citizens raising the millage to support the pensions, or the Fire Pension Board reducing the pension benefits to prevent the pension fund's bankruptcy, or a combination of both.

Agreeing to the consolidation under the conditions presented by the Arkansas Pension Relief Board would likely result only in lining the pockets of lawyers wanting to sue us for the same violation of *Article 16 § 1* that cost us millions 20 years ago. The consolidation would then be blocked, there would be no relief or additional resources for the pensioners and our taxpayers would be forced to pay attorney fees that could be in the millions.

RE: Further information for proposed consolidation of the closed Fayetteville Firefighters Pension and Relief Fund with the state retirement plan (LOPFI)

ACTUARIAL REPORT FROM LOPFI

The Actuary which spoke to you during the Special City Council Meeting does not work for LOPFI, but only for the old closed pension plan administrator which is the Arkansas Police and Fire Pension Review Board. The actuaries for LOPFI who will make the final decisions on how much our taxpayers must pay if we transfer administration and control of the pension plan to LOPFI provided the City a report concerning possible transfer of administration or consolidation of the Local Fire Pension Plan with LOPFI. There are three important comments stated by LOPFI's actuaries in their 25-year Amortization, 0% COLA, Actuarial Statement (copy attached):

“Comment B - The results shown above are based on the December 31, 2014 actuarial valuation. If the fund comes under LOPFI administration in 2015, the December 31, 2015 valuation

will determine the calendar year 2017 employer rate. **The 2017 employer rate and future employer rates are likely to differ from rates above reflecting actual investment return and mortality experience.**

Comment C - As noted earlier, these calculations are based on future events that may or may not materialize. **Readers of this report may have an expectation that the contribution shown above will be paid for 25 years and the employer will be relieved of all liability at that time. This is not the case.** As long as benefits are payable there is a possibility that employers contributions will be needed.

Comment D - The reader should note that the cash flow projection on page 10 shows the group **running out of money and therefore borrowing from LOPFI for a number of years. The financial reporting for this group will be affected significantly as a result.**" (emphasis added; Comment C said "15" years when the actuaries had to mean 25 years).

Thus our taxpayers could be forced to continue paying this debt even beyond the 25 year amortization period. Additionally the amount of taxpayer payments are likely to be increased by LOPFI as early as January 1, 2017 and must then be paid by our taxpayers. Another important statement from the LOPFI Actuarial Report discusses the costs to the City's taxpayers beginning in January of 2017.

"The reported market value of assets, \$4,377,577, for the Local Fund, as of December 31, 2014 was used in computing the employer contribution rates The actual amount transferred to LOPFI will depend on the market value of Local Fund assets when they are actually liquidated and may differ substantially from the value as of December 31, 2014. **This will likely impact the actual rate computed in the next valuation of the combined plans.**" (emphasis added).

Instead of the pension fund earning an annual return of 8% as the Arkansas Police and Fire Pension Review Board predicts, since December 31, 2014 the stock market has suffered substantial declines. The latest Market Value of Total Reserve Assets of the Local Fire Pension Plan shows the amount no longer is more than \$4,375,000 but is **substantially below \$4 million** (copy of Accounting's 8/31/15 Fire Pension Fund Reserve Expense Summary attached) which would mean that the amount required to be paid by the City in 2017 would have to be significantly increased.

If the City Council forces our taxpayers to assume about \$10 million of unfunded actuarial accrued liabilities of the local Fire Pension Board by transferring this fund to LOPFI, such action could be in violation of Article 16 § 1 of the *Arkansas Constitution*: "Neither the State nor any city, county, town or other municipality in this State shall ever lend its credit for any purpose whatever . . ." This is what happened when Fayetteville City Board of Directors agreed to pay the bond debt of the Northwest Resource Recovery Authority.

"(I)t is undisputed that under the terms of the Waste Disposal Agreement, Fayetteville was unconditionally required to pay all of the debt of the Authority This was in violation of Article 16, section 1, which provides that no municipality shall ever lend its credit for any purpose whatsoever." *Barnhart v. City of Fayetteville*, 321 Ark. 197, 206, 900 S.W. 2d 539, 543 (1995).

I and every other elected official serving Fayetteville took our Constitutionally mandated Oath of Office to "support the Constitution of the United States and the Constitution of the State of Arkansas and that I will faithfully discharge the duties of the Office of _____, upon which I am about to enter." Article 19, § 20 Oath of Office, *Arkansas Constitution*.

Without a necessary benefit reduction closer to the initially statutorily mandated 50% of ending pay, it appears almost certain that our taxpayers will eventually have to pay for the increased benefits the fire pensioners gave themselves with the approval of the State Pension Review Board. Like the payments to pay off the Resource Recovery Authority's bonds, these future general fund payments could be unconstitutional.

To fulfill my duties pursuant to my Oath of Office, I must caution every member of this City Council that agreeing to the proposed transfer/consolidate agreement proposed by the Arkansas Police and Fire Pension Review Board could be in violation of Article 16, § 1 of the *Arkansas Constitution*.

In the second case which cost Fayetteville taxpayers millions of dollars to pay plaintiffs' attorney fees, the Fayetteville Board of Directors decided to do the "right thing" by proposing a sales tax to help the Fayetteville Public Schools with a \$10 million project even though the Arkansas Attorney General had twice specifically warned them not to proceed.

"(T)he Attorney General responded that Arkansas statutes 'prohibit the City from contributing local sales tax revenue to the schools' In April of 1988, The Attorney General again informed the City that it could not contribute a part of local sales tax revenue to the local school district." *Hasha v. City of Fayetteville*, 311 Ark. 460, 845 S.W. 2d 500, 502 (1993).

I am sure members of the Fayetteville Board of Directors in 1988 disregarded these legal warnings because they felt some moral obligation to help our school children after the voters had recently rejected a substantial school millage increase. Even if warned otherwise, isn't it the "right" thing to do to help our school kids? But instead of helping the Fayetteville School District (which never received a dime of this \$10 Million Sales Tax Bond election), the only beneficiary was a Springdale lawyer who pocketed \$2.7 million claiming he was just trying to protect the school kids.

These two irresponsible actions by the Fayetteville Board of Directors helped inspire the citizens to force a change in the government to remove the City Manager and all Directors from office to be replaced by our current Mayor/City Council form of government. One of my unpleasant duties as an Alderman in 1993 was to follow the Arkansas Supreme Court's mandate and vote to pay this \$2.7 million dollars to the Springdale lawyer. Since I have become Fayetteville City Attorney in 2001, I have done my

best not to permit the waste of any more taxpayer money on exorbitant attorney fees by allowing similar unconstitutional actions to occur. I believe that is my legal, ethical and fiduciary duty to Fayetteville citizens. But I can only advise; the City Council makes the decisions.

CAN THE FIRE PENSION AND RELIEF BOARD REDUCE BENEFITS?

I have rendered an opinion to the Fire Pension Board that they have such legal right, but the Attorney General disagreed. To try to ensure the Pension Board had statutory power to save their pension fund from "ruin" (bankruptcy), I drafted and Representative David Whitaker sponsored a bill earlier this year that would have given the pension board that discretionary power to reduce benefits to save their pension fund. There was no requirement or mandate to use that power or to reduce benefits, but only the authority if the pensioners believed it was absolutely necessary. Peter Reagan and representative or members of the Arkansas Police and Fire Pension Review Board argued that they should not have this discretionary power and were able to defeat this bill in Senate after it had passed in Joint Committee and in the House.

In response to questions about how the local Fire Pension and Relief Fund had become so actuarially unsound, I sent the attached letter to Representative Whitaker on March 17, 2015. This letter details how **the top four pension beneficiaries had "collected almost \$ 3 million since their retirements in 2005, 2006 and 2008."** The pension benefits were simply increased too high by the local Fire Pension and Relief Board with the approval of the PRB to be viable. The local Fire Pension and Relief Board have known for years that it could appeal to Fayetteville voters to increase the millage supporting the pension plan, but no effort was ever attempted.

MAY FIRE PENSIONERS NEVER RECEIVE SOCIAL SECURITY BENEFITS?

The local pension plans require only 20 years of service to become fully vested and entitled to 90% plus of final pay. These pension benefits do not start at 65 or 67 like military or full Social Security benefits, but

begin immediately upon retirement which could often mean that a firefighter could retire and start receiving his pension in his 40's.

Mr. Reagan is correct that Fayetteville retired fire fighters did not pay any of their city salary to Social Security and thus did not earn Social Security benefits from their firefighting jobs at the City. However, many firefighters (who work one day on and then two days off) work a second job that would be covered by Social Security. I would also surmise that many firefighters who retired in their 40's or early 50's did obtain a second job which would also be covered by Social Security and maybe other retirement plans. Therefore, despite Mr. Reagan's implications, I find it unlikely that most pensioners have no Social Security benefits (if they have reached Social Security retirement age) or other retirement benefits in addition to their pension benefits.

**ARKANSAS LOCAL POLICE AND FIRE RETIREMENT SYSTEM
CITY OF FAYETTEVILLE PAID AND VOLUNTEER FIRE
ACTUARIAL VALUATION OF PROPOSALS UNDER CONSIDERATION
AS OF DECEMBER 31, 2014**

**25-YEAR AMORTIZATION, 0% COLA
ACTUARIAL STATEMENT**

Proposed Provisions:

No post-retirement benefit increases for Local Plan members with unfunded liabilities amortized over a 25-year closed period.

Actuarial Information:

The following shows the computed employer contribution rate applicable to Local Plan unfunded liabilities:

Contributions for	FY 2015 & 2016 Computed Employer Contributions as Percent of Payroll Local Plan Only
Normal Cost	0.00%
Unfunded Accrued Liabilities	<u>8.87</u>
Total	8.87%

Comment A — The computed employer contribution for LOPFI only for calendar years 2015 and 2016 is 24.50% of active member payroll. The combined annual employer contribution, if the Local Plan comes under LOPFI administration, would be 33.37% for calendar years 2015 and 2016.

Comment B — The results shown above are based on the December 31, 2014 actuarial valuation. If the fund comes under LOPFI administration in 2015, the December 31, 2015 valuation will determine the calendar year 2017 employer rate. The 2017 employer rate and future employer rates are likely to differ from rates above reflecting actual investment return and mortality experience.

Comment C — As noted earlier, these calculations are based on future events that may or may not materialize. Readers of this report may have an expectation that the contribution shown above will be paid for 15 years and the employer will be relieved of all liability at that time. That is not the case. As long as benefits are payable there is a possibility that employer contributions will be needed.

Comment D — The reader should note that the cash flow projection on page 10 shows the group running out of money and therefore borrowing from LOPFI for a number of years. The financial reporting for this group will be affected significantly as a result.

Fire Pension Fund Revenue Expense Summary

Re: Pension Benefits for Fayetteville Fire Pension

Dear David:

Attached are print outs of the amount of Deferred Retirement Program (DROP) checks paid out to retiring firefighters under the closed plan administered by the Fayetteville Fire Pension and Relief Board of Trustees. These 19 retirees received a total of over \$3.3 million or an average of over \$175,000.00 each on the date of retirement.

Since 2003, eleven firefighters retired under DROP with eight receiving over \$200,000.00 and the top four receiving: **\$233,000.00** (Pete Regan); **\$263,000.00** (Joey Pierce); **\$293,000.00** (Marshal Mahan) and **\$374,000.00** (Marion Doss). Since he retired about ten years ago, Pete Reagan has received about **\$650,000.00** in pension benefits. Since they retired about seven years ago, Joey Pierce has received about **\$570,000.00** in pension benefits and Marshal Mahan has received about **\$635,000.00**. Since he retired a little over nine years ago, Marion Doss has received about **\$1,050,000.00**. These four retirees have collected almost **\$3 million** since their retirements in 2005, 2006 and 2008. These major payments to later retirees have caused an unsustainable drain on the pension fund.

Representative David Whitaker
March 17, 2015
Page 2

The seven retired volunteer firefighters or their widows receive only a pittance of a monthly benefit (under \$140.00). The lowest paid regular (non-volunteer) pensioner is actually the surviving spouse of a firefighter who retired 13 years ago. She receives \$767.80 monthly or \$9,213.60 a year. There are only two other retired firefighters receiving less than \$1,000.00 per month. They both retired in 1976 (39 years ago and receive respectively \$9,674.28 and \$11,986.32 annually. There is normally a "Act 1373 Future Supplement" added as a separate payment each year to all pensioners.

If you take the **median** of the amounts paid to the 46 regular pensioners (both firefighters and surviving spouses), you find surviving spouse Sandra Jordan whose husband retired in 1995 is drawing **\$2,275.00** monthly or \$27,300.00 annually. The **average monthly** payment for these 46 pensioners is **\$2,435.00** (or \$29,217.00 annually). The pension benefits are certainly not distributed equally between the pensioners. **The top ten monthly pension benefits go from Pete Reagan's \$3,535.71 (\$42,428.00 annually) to Marion Doss's \$6,108.52 (\$73,302.00 annually).**

I have attached the Fayetteville Fire Relief and Pension reports from the City Clerk's Office which detail the figures in this letter.

With kindest regards,

COPY

RE: Possible Social Security Benefits For Retired Firefighters

SOCIAL SECURITY BENEFITS CAN BE REDUCED BY PENSION BENEFITS

Although firefighters may work in other jobs covered by Social Security before and after the retirement, and thereby earn Social Security benefits, these benefits may be reduced (not by more than 50%) by the Fire Pension benefits received by the retired firefighters. Thus, Social Security benefits will not be as helpful to retired firefighters as for most other retired workers.

This is true for most pension beneficiaries who did not pay Social Security taxes for employment covered by the pension. If pension benefits are high enough, as much as 50% of what their Social Security benefit would have been will not be paid to the retired pensioner.

RE: Procedure to raise millage rate supporting closed Fire and Police Pension and Relief Funds: **Amendment 31 Police and Firefighters' Retirement Salaries and Pensions**

Amendment 30 City Libraries provides clear procedure for a petition for the tax levy for an election to establish or change the tax levy to support city libraries. **Amendment 32 County or City Hospitals** likewise establishes clear procedure for a petition for tax levy to support such public hospitals.

Amendment 31 Police and Firefighters' Retirement Salaries and Pensions has no similar procedural provisions explaining how to petition for an election to levy the millage. However, A.C.A. § 24-11-402, 403 and 404 (Police) and §§ 24-11-812 (Firefighters) provide statutory authorized procedures for submitting the question of millage to support these pension funds. I believe that the millage increase elections should be requested and called by:

1. Both pension boards should pass irrevocable resolutions requesting that the City Council consolidate administration of their pension funds

with LOPFI pursuant to a 25 year amortization with 0% COLA Agreement and appoint the City Council to be its agent in this process if the citizens approve increasing each fund's supporting millage from .4 to 1.0.

2. Then, the City Council should approve a Special Election for both funds to increase the millage rate from .4 to 1.0 mill to be paid to the City which would then pay all such millage revenue to the Arkansas Local Police and Fire Retirement System.

3. The City should draft an appropriate petition requesting an election to increase the millage for both funds with the proceeds to be paid to the City and then sent to the Arkansas Local Police and Fire Retirement System to fund both the local closed plans and the ongoing LOPFI plan for current police officers and firefighters when they retire.

If the citizens vote to increase the millage in order to enable the consolidation of the administration of the local closed plans and help pay future expenses for new police and fire retirees, the constitutional problems of the City of illegally assuming the debts of the closed plans should be resolved and the future financial stability of all pension benefits for all retirees (old and new LOPFI plans) should be assured.

Subject: Fayetteville Firemans Retiree Plan

Mayor Lioneld Jordan and the Fayetteville City Council

This email is concerning the old Fireman's Pension Plan for the City of Fayetteville.

I am Donna Mason, the wife of FFD retiree Larry Mason. My husband was a Fayetteville firefighter for the city, until he developed Parkinson Disease and had to take an early retirement. Larry was 34 years old when he first became ill. When Larry first became ill with Parkinson Disease I took him to Houston, TX to the best Parkinson doctor available. This specialist had done many studies on the disease and its causes. At the time the doctor told us that Larry probably had Parkinson Disease from being a fireman. Early onset of Parkinson Disease is very rare and firemen at the time had a higher percentage of the disease than the normal public. He stated that he had probably breathed some fumes in a fire and that caused the disease. My husband as Pat Boudrey stated in her email was a member of the "Old Guard". He went to numerous fires that required going into buildings and not having the proper equipment to safely protect the

firefighter. After he developed the disease Larry still worked as a fireman for about 8 years until the disease progressed to the point he could no longer work.

My husband has had the disease for 34 years and as you can imagine is classified as catastrophically disabled. My husband and I have been married for 46 years and I have taken care of him and stood beside him while raising two boys. We depend on this retirement for a living. When Larry joined the fire department he was told his retirement that he contributed to would be for the rest of his life and for the rest of my life as well. He was not allowed to pay into social security or medicare as some of the other city jobs are.

My husband risked his life to protect the City of Fayetteville and make the City a more secure place to live. My husbands life story is just one of many similar stories from these aging firefighters. I feel like it is the moral duty of the City of Fayetteville to take care of the aging firefighters and their spouses and stand by them in their time of need. It is very stressful to take care of a severely disabled person and I am asking the City of Fayetteville to help relieve some of this stress by voting for the retirement plan to be sent to LOPFI with the current benefits.

Thank you,

Donna Mason

Resolution to Assign Local Plan Administration to LOPFI

Whereas, the Board of Trustees (the Board) of the FAYETTEVILLE FIRE Pension and Relief Fund (the Local Plan), desires to assign administration of the Local Plan to the Arkansas Local Police and Fire Retirement System (LOPFI) pursuant to Act 364 of 1981, as amended; and

Whereas, such action shall not change the benefit structure unless a benefit increase is approved by the governing body of FAYETTEVILLE, Arkansas; and

Whereas, the Board received and reviewed the latest actuarial report from LOPFI, which states the initial required employer contribution rate(s); and

Whereas, LOPFI will administer the Local Plan at an annual cost not to exceed ½ of 1% of active member payroll plus 1% of average annual assets of the Local Plan; and

Whereas, the Board finds it is in the best interest of the Local Plan and its participants to have LOPFI administer the Local Plan; therefore,

BE IT RESOLVED, the Board hereby elects to assign administration of the Local Plan to LOPFI.

BE IT FURTHER RESOLVED the Board requests the CITY OF FAYETTEVILLE, a political subdivision of the State of Arkansas, to act as its agent henceforth.

BE IT FURTHER RESOLVED the Board understands any agreement to administer the Local Plan by LOPFI shall be entered into by and with the governing body of FAYETTEVILLE, Arkansas, as the Board's agent, and that such agreement shall dissolve said Board of Trustees.

CERTIFICATION

We certify this Resolution accurately states the action of said Board of Trustees. Approved this 30 day of SEPTEMBER 2015.

FAYETTEVILLE FIRE FIGHTERS OLD PENSION PLAN

MAYOR LIONELD JORDAN AND THE FAYETTEVILLE CITY COUNCIL

THIS EMAIL IS IN REGARD TO THE OLD PENSION PLAN FOR THE RETIRED FAYETTEVILLE FIREFIGHTERS. I AM PAT BOUDREY, THE WIFE OF FFD RETIREE JACK BOUDREY AND THE MOTHER OF CURRENT 22 YEAR VETERAN FFD FIREFIGHTER BATTALION CHIEF TRAVIS BOUDREY.

I WAS IN ATTENDANCE AT THE CITY COUNCIL MEETING LAST TUESDAY, SEPTEMBER 29. THEREFORE, I AM AWARE OF ALL THE FACTS PRESENTED THAT EVENING. MY VIEWPOINT IS NOT LEGALITY OR GENERAL FUND DRIVEN. THIS GROUP OF MEN AFFECTIONALLY CALLED THE "OLD GUARD" HAVE FOUGHT SOME OF THE WORST FIRES IN THE CITY OF FAYETTEVILLE'S HISTORY. MANY BUILDINGS STAND TODAY BECAUSE OF THEIR VALLIANT EFFORTS, ASK THE CONGREGATION AT THE CENTRAL UNITED METHODIST CHURCH ON DICKSON STREET, SEVERAL BUILDINGS AT THE UNIVERSITY OF ARKNASAS INCLUDING OLD MAIN AND HILL HALL, BUSINESS BUILDINGS AND PRIVATE HOMES TOO NUMEROUS TO MENTION.

BACK IN THEIR DAY THEY FOUGHT THESE FIRES WITHOUT MUCH OF THE NECESSARY EQUIPMENT NEEDED. MY HUSBAND ON MANY OCCASIONS, ENTERED BURNING BUILDINGS WITHOUT A SCOTT AIRPACK BECAUSE THERE WASN'T ENOUGH ON THE TRUCK TO SUPPLY EVERYONE.

OH, DID I MENTION THEY WERE ALSO REQUIRED TO RUN THE AMBULANCE SERVICE FOR THE CITY OF FAYETTEVILLE.

WITH NO EMT OR PARAMEDIC TRAINING WHAT SO EVER, THEY HAD TO RELY ON A CPR CLASS, A FIRST AID KIT, AN OXYGEN TANK AND A LEAD FOOT ON THE GAS PEDAL TO GET THE PATIENT TO THE HOSPITAL, NEEDLESS TO SAY SOMETIMES IT DIDN'T END TO WELL. THE LOSS OF THE PATIENT ALWAYS LED TO A HELPLESS AND DISTURBING FEELING, WITH WHICH THEY HAD TO COPE.

THERE WAS THE MANDATORY LIVE IN TOWN RULE.

WE HAD TO RESIDE INSIDE THE CITY LIMITS OF FAYETTEVILLE, CHECKING "OUT OF TOWN" IF WE WENT ACROSS THE BORDERS OF THE CITY. JACK & I BOTH HAD PARENTS LIVING IN SPRINGDALE, THEREFORE JUST TO GO SEE THEM REQUIRED CALLING STATION #1 TO CHECK OUT OF TOWN. IF THERE WERE OTHERS AHEAD OF US ALREADY OUT OF TOWN WE HAD TO WAIT TO VISIT ANOTHER TIME. THE REASON FOR THIS, THEY WERE ON CALL 24/7, ALWAYS SHORTHANDED. BETWEEN BEING ON 24 HOUR SHIFTS AND UP NIGHTS WHILE ALWAYS ON CALL, WELL IT MADE SLEEP, A LUXURY.

THE OLD GURAD IN MANY CASES WORKED SEVERAL YEARS ALONE AT THE FIRE STATIONS FOR THEIR 24 HOUR SHIFTS, BEING THE FIRST ON THE SCENE ALONE WAS SCARY AND DEMANDING. THEY COULD ONLY DO WHAT ONE MAN COULD DO UNTIL FIREFIGHTERS THAT WERE ON CALL OR AT OTHER STATIONS COULD GET THERE TO ASSIST.

ALL THE LIVES OF THE FAMILIES WERE FULL OF SACRAFICES SO THE HUSBAND COULD DO THE JOB REQUIRED BY THE CITY OF FAYETTEVILLE. VACATION WAS THE ONLY TIME THEY WERE TRULY AWAY FROM THE JOB. SO AS YOU CAN TELL LIFE WASN'T EASY ON THE HOME FRONT EITHER.

THE CITY HAS MADE GREAT STRIDES IN EQUIPMENT, MAN POWER AND FIRE PREVENTION FROM THE OLD GUARD DAYS UNTIL PRESENT.

I HAVE A SUMMARY OF THE AGES OF THE 51 PENSIONERS THAT RECEIVE CHECKS EACH MONTH. I REALIZE THESE AGES HAVE BEEN INCULDED IN THE ACTUARY STUDY PERCENTAGE YOU RECEIVED LAST TUESDAY FROM THE PENSION REVIEW BOARD.

TO SEE THEM ON PAPER MIGHT BE A LITTLE DIFFERENT IN THE FACT THAT MANY NEED THEIR MONEY NOW AS THEY FINISH OUR THEIR LIVES NOT 15 OR 25 YEARS DOWN THE ROAD WHERE ALL OF YOU ARE WORRIED THAT MONIES WILL HAVE TO COME FROM THE GENERAL FUND. I ALSO REALIZE YOU HAVE A DUTY TO THE TAXPAYERS AND CURRENT CITY EMPLOYEES TO NOT O.K. SOMETHING TODAY THAT WOULD HAVE AN ADVERSE AFFECT 25 YEARS DOWN THE ROAD BUT LOOKING AT THESE AGES WILL DRAMATICALLY REDUCE THE LIABILITY THAT SHOULD EVER INCUR, IF ANY.

90 PLUS— 3
80 PLUS— 6
70 PLUS— 18
60 PLUS— 15
50 PLUS— 9

TO BREAK IT DOWN FURTHER

THERE ARE **13** WIDOWS WITH AND AVERAGE OF AGE **79**.

THERE ARE **9** FIREFIGHTERS THAT ARE SINGLE WITH AN AVERAGE AGE OF **68**.

THERE IS **1** COURTORDER SPLIT WHICH IS IN CONJUNCTION WITH A SINGLE FIREFIGHTER.

THEREFORE, THESE **23** PENSIONERS HAVE NO BENEFICIARIES, IT STOPS WITH THEM.

THE AVERAGE AGE OF THE REMAING **28** FIREFIGHTERS IS **68**

PLEASE CONSIDER THESE MEN AREN'T AN INCINERATOR THE CITY WASN'T LIABLE FOR, ALTHOUGH THEY FOUGHT INFERNOS THAT SEEMED LIKE INCINERATORS. THEY ARE AGING CITY EMPLOYEES THAT GAVE THE CITY 20 TO 40 YEARS OF THEIR LIFE. THE CITY PROMISED THEM A PENSION THE REST OF THEIR LIVES AND THEN TO THEIR WIDOWS. THE CITY DID NOT WITHHOLD SOCIAL SECURITY BECAUSE THIS PENSION PLAN WAS THE PRIMARY PENSION PLAN BEING A CIVIL SERVANT. MANY OF THESE FIREFIGHTERS ARE NO LONGER ABLE TO WORK. THE LIVELYHOOD OF THE HOUSEHOLD DEPENDS ON THESE MONTHLY CHECKS. PLEASE PUT A PENCIL TO IT, TAKE THE MORAL HIGH GROUND, DO THE RIGHT THING AND VOTE TO SEND THE OLD PENSION PLAN TO LOPFI WITH THE SAME BENEFITS WE ARE RECEIVING TODAY.

THANK YOU FOR YOUR CONSIDERATION,
